Education

Sardar Patel Institute of Technology, Mumbai — *CGPA: 7.38 agg*

- *Bachelor of Technology in Electronics and Telecommunication (2022-2026)*
  Minors in Computer Engineering

Lakshya Institute, Chembur, Mumbai — *2020 - 2022*

- *12th Grade: 80.50%*

Experience and Leadership

Intern - GAIL (Gas Authority of India Limited) — *July 2024 – Present*

- : Received a post-hackathon internship offer from GAIL to productionize and enhance our SIH-winning project — Samarth AI — aimed at transforming internal communication and automation within large-scale public sector environments.
- : Integrating advanced functionalities such as dynamic data visualization, role-based confidential information masking, and intelligent policy summarization to ensure secure, scalable, and real-time deployment.

Intern - TechAsia Mechatronics — *January 2024 – June 2024*

- : Led the frontend development of a responsive web portal for a portable healthcare device, designed to monitor and display real-time patient data with an intuitive user interface built using HTML, CSS, and JavaScript.
- : Collaborated on full-stack integration by developing backend systems in PHP and MySQL, ensuring secure data flow, fast access, and optimized performance for real-time healthcare monitoring.

Vice Chairperson - IEEE-SPIT Student Branch — *August 2024 – May 2025*

- : Led Techtopia – SPIT's first-ever 2-day techfest, attracting 1300+ participants through workshops, competitions, and speaker sessions.

Projects

- **SamarthAI (SIH 2024)**: *Tech Stack: React.js, Tailwind CSS, PyPDF2, Tesseract OCR, LLaMA, FastAPI, ChromaDB*
  - **Conversational Support:** Developed an AI-powered chatbot to automate internal enterprise query handling for 10+ concurrent users, reducing average resolution time by 92%.
  - **RAG Architecture:** Implemented Retrieval-Augmented Generation using LLaMA for natural language understanding and ChromaDB for document retrieval. Added contextual chunk headers to improve accuracy, achieving 95% precision with sub-2 second response time on domain-specific datasets.
  - **Secure and Scalable:** Designed a FastAPI backend with support for concurrent streaming, 2-factor authentication, and role-based access control to ensure data security and operational scalability.
- **GenAI-Based Inventory Management System for MSMEs**: *Tech Stack: Python, SQLite, Email Extraction, PDF Parsing, CSV Processing, Google's Gemini, NLP*
  - **Automated Inventory:** Upload PDF or CSV bills to automatically create and update inventory tables, reducing manual data entry by 85%.
  - **Email to SQL:** Converted retailer email orders to SQL queries using email parsing and Gemini, reducing order handling time by 90%.
  - **AI Integration:** Enabled non-technical users to query inventory using natural language, eliminating the need for SQL knowledge.
- **Blood Bank Automation**: *Tech Stack: HTML, CSS, JavaScript, Django, SQLite, RFID, ESP32 microcontroller*
  - : Led the development of a blood bank automation system using RFID technology. Built a web platform for real-time inventory management, donor tracking, and supply alerts. Optimized operations for efficient blood inventory management and rapid response to supply demands that reduced manual tracking efforts by 88%.

Technical Skills

- **Programming & Web Technologies:** Python, C/C++, JavaScript, HTML, CSS, ReactJS, Firebase, SQL, NoSQL, PHP
- **AI/ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, YOLO
- **NLP & Language Models:** Hugging Face Transformers, BERT, GPT, Whisper, spaCy, NLTK, LLaMA
- **Model Deployment & Platforms:** Flask, Streamlit, Google Gemini, OpenAI API
- **Tools:** Git/GitHub, Figma, Postman, Tesseract OCR, PyPDF2, ChromaDB

Achievements

- **Smart India Hackathon 2024 Winner:** Secured a win at the prestigious Smart India Hackathon (SIH) software edition 2024.
- **Conference Paper Accepted – ICMOCE 2025, IIT Bhubaneswar:** Authored and presented the paper *"Robust Vehicle Detection in Aerial Imagery: Comparative Study of YOLO Variants"*, comparing YOLOv8, YOLOv11, and YOLOv12 for satellite-based vehicle detection, establishing new benchmarks for aerial surveillance and traffic analytics.
- **Technovate 2.0 National Hackathon:** Secured a place in the top 10.
- **Code Odessey 2024 National Hackathon:** Secured a position in the top 5 out of 120+ teams.
