EDUCATION

Bharatiya Vidya Bhavan's S. P. Jain Institute of Management and Research Dec. 2025
Minors In Management Ongoing
Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology Jun. 2026
B.Tech. Electronics and Telecommunication Current GPA: 8.5/10.0, Ongoing

EXPERIENCE

Application Developer Intern | *Russell Investments* | **Python, .NET, React, MSSQL** May. 2025 - Present

- Implemented a **Generative-AI based Minutes-of-the-Meet generator** for the GTM Team to improve workplace efficiency by 12%
- Developed a **Database Monitoring System** that monitored database health, applications accessing company databases, and query performance, enabling proactive issue detection, improved system uptime, and enhanced security through access auditing and anomaly detection, while also implementing **data governance tracking to ensure compliance** with data access policies, audit trails, and regulatory standards
- Collaborated with a team of 8 to design and develop BookMyWorkspace**, a web application that enabled employees to reserve workspaces within the office on non-work-from-home days, improving space utilization and supporting hybrid work policies across the organization.

RESEARCH

An Overview of the Hospitality Industry in India | *Industry Analysis, Interviews* | Paper: [Link](#) | Repository: [Code](#) Aug. 2024

- Conducted in-depth research on the evolution, current state, and future prospects of India's hospitality sector, for a comprehensive analysis of industry dynamics.
- Interviewed 2 top executives from prominent companies, including Taj Hotels, gathering insights that validated 25% of research findings and uncovered 4 nuanced industry trends.
- Developed Python scripts to create 8+ data visualizations, enhancing comparative analysis and supporting data-driven conclusions.
- Analyzed Corporate Social Responsibility (CSR) initiatives of 33 top hotel brands in India and assessed their impact on sustainability within the hospitality industry.
- Evaluated Corporate Governance (CG) practices across 13 major hospitality chains, examining their influence on operational efficiency.

ACHIEVEMENTS

- Google Girl Hackathon 2025 Finalist:** Built [Percy](#), an AI-powered end-to-end development ecosystem.
- Academic Excellence Award:** Ranked 1st in school for the ICSE Board; awarded for academic distinction.
- Best Paper of the Session:** Published in IEEEExplore on an IoT-based realtime IV infusion patient monitoring system.
- 3rd Place:** Build Your Own Portfolio competition by ZeTheta Algorithms and FEC-SPIT, focused on investment strategies.
- 4th Place:** Ops Questa case study competition by IIM Raipur, optimizing supply chain and logistics.

POSITIONS OF RESPONSIBILITY

Chairperson, C.S.I. - S.P.I.T. | C.S.I. - S.P.I.T. Website: [Link](#) Sept. 2023

- Led financial strategy and budgeting for 7 major events, including 2 hackathons and 3 coding competitions (one in collaboration with 3 other colleges), managing a total budget of INR 250,000 with a 94% utilization rate.
- Collaborated with 5 cross-functional teams of 4 members each to manage marketing campaigns, logistics, and overall event execution, achieving successful outcomes and high levels of participant engagement.
- Coordinated efforts between the technical team and participants, bridging the gap by translating complex technical concepts into accessible information for a diverse audience.

PROJECTS

Barclays Hack-O-Hire Challenge May 2025

- Led a cross-functional team of 5 to develop **Walley**, an AI-powered observability platform for predictive API failure analysis in hybrid environments.
- Developed an AI-based monitoring system combining **adaptive anomaly detection** (Autoencoders) and **time-series forecasting** (LSTM) to detect and predict API failures in real time.
- Developed **smart alerting system** to reduce alert fatigue, aimed at consolidating 20+ daily alerts into 5-8 high-confidence actionable alerts.
- Integrated FastAPI, Prometheus, Elasticsearch, Kibana, and Grafana for full-stack deployment and real-time monitoring.
