EDUCATION

Sardar Patel Institute of Technology

Dec. 2022 – May 2026

Bachelor of Technology in Electronics and Telecommunication Engineering

Mumbai, India

- **Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming (OOP), Software Testing

WORK EXPERIENCE

Subject Matter Expert — Chegg

Apr 2023 – Oct 2024

Remote

- Solved *Physics and Computer Science* queries with **step-by-step, concept-focused explanations** for global students.
- Debugged code and clarified programming concepts in **C++** and **Java** to assist with academic assignments.
- Refined technical communication skills by supporting diverse academic needs across international time zones.

PROJECTS

Proctorap – Web-Based Proctoring System | *Node.js, Express.js, PostgreSQL, Prisma*

🔗 proctorap.harshdev.cloud

- Developed a **security wrapper** that transforms any online test (*Google/Microsoft Forms, etc*) into a monitored assessment in under 30 seconds.
- Implemented **real-time violation detection** including tab switching, fullscreen exits monitoring.
- Built comprehensive **evidence collection system** with automatic screenshot capture for secure storage.
- Created educator dashboard with live violation reports, detailed attempt analytics, and comprehensive evidence review system.

FOA – AI Voice Interviewer | *Next.js, Node.js, Prisma, PostgreSQL, AWS EC2*

🔗 app.foai.harshdev.cloud

- Serves **70+ active users** with voice-based mock interviews using **STT → LLM → TTS** pipeline and JWT/OAuth2 authentication.
- Generates **contextual follow-up questions** using resume, job description, and conversation history via Gemini API.
- Delivers post-interview analysis with ideal candidate answers and personalized feedback.
- Achieved **90% pipeline latency reduction** and deployed on AWS EC2 with PostgreSQL backend.

Moodle Assignment Automation | *Playwright, React.js, AWS EC2, Redis, Bull Queue*

🔗 moodle.harshdev.cloud

- Serving **130+ students** with automated assignment completion using Redis caching, browser pooling, and Bull Queue job processing.
- Built content pipeline using Playwright automation, Mammoth.js, and Gemini to generate contextual assignments.
- Engineered concurrent document generation using DOCX templates and Supabase storage, handling **500+ assignments/month**.
- Achieved **99% uptime** and **6x parallelization** via optimized **worker** architecture and multi-layered caching strategy.

TECHNICAL SKILLS

Languages: Java , JavaScript

Technologies/Frameworks: Node.js, React, Next.js, TypeScript, Express.js, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda)

ACHIEVEMENTS

National Finalist - EY Techathon 5.0 — Top 11 out of 1.5L+ entries and 6,300+ submissions.

Top 105 - Google Solution Challenge — Out of 64,000+ entries and over 3,700+ submissions.

Finalist - K! Hacks 2.0 — Selected in Top 25 from 4,500+ entries at CEG, Anna University.

Finalist - AIRAVAT 2.0 — Selected in Top 12 from 600+ entries at S.P.I.T, Mumbai University.

Solved 900+ DSA Problems across platforms like LeetCode, Codeforces, and GeeksforGeeks.
