Education

Sardar Patel Institute of Technology

B.Tech in Electronics and Telecommunication

12/2022 – 07/2026

GPA: 6.5/10

Experience

Amazon

06/2025 – 08/2025

Team Lead Intern

- Validated 50,000+ geospatial datapoints in Mercury's routing engine using statistical checks, improving delivery accuracy and lifting Delivery Success Rate (DSR) by 2%.
- Integrated 15+ store systems into a unified routing framework, raising delivery efficiency above 96%.
- Built 3 real-time dashboards with Analysts, exposing delivery leakages and KPIs, reducing annual financial loss by 8L.
- Directed workload allocation for 60+ associates, balancing utilization across regions and accelerating completion speed by 18%.

JSW Severfield Structures Ltd.

07/2024 – 08/2024

Data Analyst Intern

- Automated HR data workflows with scripted queries, cutting manual tasks and saving 6+ staff hours monthly while boosting reporting accuracy by 30%.
- Analyzed employee turnover with SQL and Pandas, producing reports that highlighted retention trends and cost-saving measures.

Projects

Portfolio Risk Management | Python, CVXPY, Pandas

01/2025

- Optimized 20+ portfolio scenarios using convex optimization, raising Sharpe ratios by 15% and improving allocation efficiency.
- Applied Markowitz strategies on 12 equity datasets, reducing variance by 10% and improving return stability.
- Simulated parameterized risk-aversion models, enabling efficient investor profile allocation decisions.

JPMorgan Chase IB Job Simulation (Forage)

04/2024

- Analyzed M&A targets via capital structure, multiples, and client alignment, drafting due-diligence notes on feasibility.
- Constructed DCF models factoring competitor bids and supply risks, improving valuation accuracy in uncertain cases.
- Prepared client briefing with profiles, valuation outcomes, and auction analysis, supporting deal decisions.

Room Allocator Bot (Discord) | Python

12/2023

- Developed a bot automating room allocation for 30+ daily users, cutting processing time by 90%.
- Implemented data structures for dynamic allocation across 500+ sessions, ensuring high performance.

Relevant Coursework

- | | | |
|----------------------------|------------------------|-------------------------|
| • Data Structures | • DBMS | • Systems Programming |
| • Convex Optimization | • Financial Management | • Computer Architecture |
| • Probability & Statistics | • Network Protocols | |

Technical Skills

Languages: Python, C++, C, SQL, JavaScript, HTML/CSS

Frameworks: NumPy, Pandas, Matplotlib, PyTorch, TensorFlow

Tools: Git, GitHub, LaTeX, Excel, Power BI

Positions of Responsibility

Training and Placement Office

08/2023 – 11/2024

Research Team Member

- Coordinated 4+ recruitment drives by managing outreach, event scheduling, and student-employer communication, improving participation and satisfaction.
- Compiled databases of 400+ HR professionals with automated scraping and SQL pipelines, strengthening recruiter engagement.
- Negotiated onboarding of 3 companies by preparing outreach material and facilitating discussions, expanding placement opportunities.
