EDUCATION

Sardar Patel Institute of Technology

Bachelor of Technology in Electronics and Telecommunication Engineering;

2022 – 2026

Mumbai, India

POSITIONS OF RESPONSIBILITY

Chairperson | *Institution of Electronics and Telecommunication Engineers (IETE), SPIT*

2023 – 2024

- Led a 40+ member team, restructured workflows, and collaborated with national IETE bodies and executives from Google, Deutsche Bank, and Jaguar Land Rover to host panels on AI, Data Science, and core engineering—achieving a 4× increase in engagement.
- Conceptualized and launched a national-level hardware troubleshooting hackathon with 150+ participants, addressing hands-on learning gaps and creating a flagship event in applied electronics.
- Managed Rs.5L+ budgets, partnered with 20+ vendors and sponsors, and executed a 150+ participant trek and camp—ensuring delivery under constraints through logistics and risk-managed planning.

PROJECTS

SQL-Based Data Warehouse & Analytics System | *SQL Server, T-SQL, ETL, Data Modeling, Window Functions*

- Built a full-scale data warehouse using 4+ years of ERP/CRM data, following the Medallion architecture (bronze–silver–gold) for efficient abstraction.
- Designed ETL pipelines, materialized views, and optimized query performance for scalable analytics.
- Performed deep EDA to uncover trends in customer behavior, regional sales, and product performance.
- Created 10+ advanced analytical scripts with window functions for segmentation, ranking, and cumulative metrics.
- Delivered automated reports highlighting top products, revenue by region, and underperforming categories—impacting business decisions.

Credit Risk & Customer Segmentation System | *Python, Pandas, scikit-learn, Matplotlib, NumPy*

- Simulated a full credit lifecycle system using LendingClub loan data (2.2M records), covering underwriting, fraud detection, and segmentation.
- Engineered key features like DTI, FICO bands, and credit utilization; performed borrower risk EDA.
- Built classification models (Logistic Regression, Random Forest) for default prediction, evaluated using AUC and confusion matrix.
- Applied KMeans clustering for segmentation; used SHAP and feature importance for model interpretability and business insight.

Business and Financial Analysis – Hindustan Unilever Ltd. | *Excel, Financial Modeling, Forecasting, Risk Assessment*

- Structured and Analysed 10+ years of financial data to build models for sales and EBITDA forecasting, DuPont(RoE and RoA)breakdown, and performance benchmarking.
- Estimated Value at Risk (VaR) using Monte Carlo simulations to support strategic risk analysis.

ACHIEVEMENTS

2nd Runners-Up (Top 3 of 200+ teams) | *Goa Institute of Management International Case Study Competition*

- Developed a re-entry strategy with a sustainability-first brand model and created a structured 5-year GTM and execution plan emphasizing profitability and communication clarity.

CERTIFICATIONS

Google Digital Marketing & E-Commerce Specialization – Coursera

- Completed 7-course specialization covering SEO/SEM, social media marketing, Google Ads, and customer engagement strategies.
- Gained hands-on experience with marketing analytics, conversion tracking, Google Analytics, and Shopify store setup.
- Focused on KPIs, A/B testing, and data-driven performance measurement across the digital marketing funnel.

SKILLS

Technical Skills: Python, NumPy, Pandas, scikit-learn, SQL, Excel, PowerPoint, Tableau

Core Competencies: Financial Analysis, Data-Driven Strategy, Risk Assessment, Problem Solving
