PROFESSIONAL SUMMARY

B.Tech final-year student in Electronics and Telecommunications with strong skills in Python, SQL, and data analysis. Hands-on experience in data cleaning, transformation, and visualization. Recently completed a short data analysis internship and developed a data-driven dashboard project. Passionate about data engineering fundamentals and quick learner of new tools.

SKILLS

Programming: Python (Pandas, NumPy, Matplotlib), SQL (PostgreSQL)

Data Engineering: Data Collection using APIs, Data Cleaning & Wrangling, Data Loading with Pandas & SQL, Data Validation, Data Visualization (Matplotlib, Seaborn)

Tools: Power BI, MS Excel, Git

Other: Data Analysis, Problem Solving, Team Collaboration

EXPERIENCE

Virtual Data Analysis Internship — Completed a short-term virtual internship focusing on data cleaning, transformation, and visualization using Python (Pandas, Matplotlib). Worked on real-world datasets to derive insights and prepare summary reports.

Sports Team Captain – Cricket & Volleyball (District Level, 2 Years) — Led teams as captain, representing at the district level for two years. Coordinated team strategy, practice sessions, and maintained team morale and discipline.

Event Management Team Member – Annual Cultural Gathering — Organized annual cultural events, managing planning, logistics, and backstage coordination. Gained experience in teamwork and time management.

PROJECTS

COVID-19 Data Analysis & Dashboard (Python, Power BI) — Built a data analysis project using COVID-19 API data. Collected live data through API calls, cleaned and processed the dataset using Pandas, and created an interactive dashboard using Power BI.

Credit Card Fraud Detection System (Python, AI/ML) — Developed a machine learning-based system to detect fraudulent credit card transactions using Logistic Regression and Random Forest. Implemented data preprocessing and transformation techniques.

Wireless Charging System for Electric Vehicles — Designed and simulated an inductive wireless charging system for EVs operating at ~300 kHz. Focused on coil design, compensation network selection, and efficiency optimization.

Torque Ripple Detection in PMSMs (FEMM Simulation) — Simulated IPMSM & SPMSM motors using FEMM to analyze torque ripple characteristics and proposed design improvements.

ACHIEVEMENTS & ACTIVITIES

- **1st Place – School Science Exhibition (Agricultural Innovation Project):** Developed a practical, low-cost solution aimed at assisting rural farmers with daily agricultural tasks. Secured 1st rank at the school level, advanced to the division level, and was selected as a finalist among top participants. Recognized for innovation and real-world impact.
- **Finalist – Case Study Competition:** Participated in a competitive case study event focused on solving real-life problems through analytical thinking and teamwork. Reached the final round, presenting solutions with strategic and data-driven insights.

EDUCATION

Sardar Patel Institute of Technology, B.Tech in Electronics and Telecommunications — Expected Jun 2026 — Andheri, Mumbai

Relevant Coursework: Data Structures, DBMS, Machine Learning

Vasantrao Naik Junior College, Maharashtra State Board, Science: 95% — Graduated Jun 2021 — Islapur, Dist. Nanded

Raja Bhagirath Vidyalaya, Maharashtra State Board: 91.2% — Graduated Jun 2018 — Himayatnagar, Dist. Nanded
