PROFILE SUMMARY

B.Tech candidate in Electronics and Telecommunication Engineering with a Minor in Computer Engineering (expected graduation: 2026). Proficient in full-stack web development, mobile app development (React Native, Java, Kotlin), and RESTful API integration. Experienced in developing real-time applications, implementing machine learning models, and working with cloud platforms like Firebase. Strong foundation in algorithms, data structures, object-oriented programming (OOP), and system design.

EDUCATION

- **Sardar Patel Institute of Technology** Mumbai, India
B.Tech in Electronics and Telecommunication Engineering Nov. 2022 – Jun 2026
- **Sardar Patel Institute of Technology** Mumbai, India
Minors in Computer Engineering Jan 2024 – Dec 2025

PROJECTS

- **Bio-Medical App** | *Typescript, React, Figma, AWS, GitHub* Feb 2025 – Present
 - Developed a native Android app for real-time remote patient monitoring, enabling accurate auscultation of heart, lung, and stomach sounds across **50+ test patients**.
 - Designed and prototyped an intuitive **UI/UX (Figma)** improving user onboarding time by **30%** for patients and healthcare providers.
 - Engineered machine learning-powered audio analysis, detecting potential abnormalities with **more than 91% accuracy** in preliminary testing.
 - Implemented seamless Bluetooth connectivity, achieving **95% stable data transfer rate** from external devices.
- **SprintSync – Fitness App** | *React Native, Firebase, HERE Maps API, GitHub* May 2025 (1-day Hackathon)
 - Built a cross-platform fitness app in a **team of 3 developers**, supporting **real-time GPS tracking** with less than 5m average error margin using **HERE Maps API** within 24 hours during a hackathon.
 - Integrated Supabase backend, handling auth and session storage for **50+ early users**.
 - Developed responsive UI with live pace, distance metrics, and session history, increasing user engagement time by **25%**.

POSITION OF RESPONSIBILITY

- **Scrum Master and Software Architect** | **KhelKonnnect** Apr 2025 – Aug 2025
 - Building robust API endpoints managing sprints for tournament management.
 - Led a **team of 3 interns** as Scrum Master, assigning tasks, mentoring on coding standards, and ensuring all sprints were delivered on schedule.
 - Oversaw API testing and version control, ensuring **zero major integration bugs**.

TECHNICAL SKILLS

- **Languages:** C++, JavaScript, Java, SQL, HTML5
- **Framework/Libraries:** React, Node.js, Express, Tailwind CSS, Vite
- **Tools/Technologies:** MongoDB, Android Studio, Firebase, Figma, VS code, GitHub, MySQL Workspace
- **Concepts:** OOP, Data Structures, Algorithms, DBMS, Operating Systems

EXTRA-CURRICULAR ACTIVITIES

- **Sports:** Active participant in Volleyball at inter-college level tournaments, demonstrating teamwork, agility, and competitive spirit. Regular runner with focus on endurance and discipline.
- **Music:** Skilled guitarist with experience in live performances. Enthusiastic about software-based music composition and production, exploring digital audio workstations for creating original tracks.
