Summary

College student passionate about coding, IoT, and electronics. Gained solid skills and knowledge through projects and self-learning. Enjoy working in teams and contributing to group projects. Excited to explore and innovate in IoT and electronics, and looking for opportunities to grow and make a difference.

Education

Bhartiya Vidya Bhavans Sardar Patel Institute of Technology, Mumbai Jan 2022 – Dec 2026
(Expected)

- Bachelor's Degree in Engineering
- SGPA: 8.56/10.0

Projects

IoT based smart energy meter Jan 2024 – Present

- Developed an IoT-based smart energy meter using ESP32 microcontroller
- Monitors real-time energy consumption (voltage, current, power, bill amount) on OLED display
- Safety feature: Automatically turns off when voltage exceeds 230V
- Integrated with Telegram bot for remote monitoring, recharging, and control

E-Commerce Flutter App Mar 2024 – May 2024

- Developed a feature-rich shopping app using Flutter with modern UI/UX
- Implemented product listings, shopping cart, wish list, and profile management
- Created secure login functionality and seamless order placement system
- Integrated responsive UI and smooth navigation for optimal user experience
- Demonstrated cross-platform development capabilities with Flutter

Certifications

- **Bug Buster 2024 - IETE SPIT** Apr 2024
- **CASE QUEST - National Level Case Study Finalist** Nov 2023
- **Jack of All Trades - General Management Case Competition** Oct 2023
- **SPIT Hackathon 2023** Aug 2023

Skills

Programming Languages: Java, Dart

Mobile Development: Flutter, Android Studio

Embedded Systems & IoT: Arduino IDE, Proteus, Embedded Systems
