Education

Bhartiya Vidya Bhavans Sardar Patel Institute of Technology, Andheri, Mumbai
Bachelor of Technology in Electronics and Telecommunications

2026
6.59

Experience

Embedded Systems Intern
Viraj IoT Solutions (VISO)

June 2025 - July 2025

- Designed the foundation for a CAN-based communication system using ESP32 and an LCD display.
- Developed a custom communication protocol tailored for master-slave data exchange over CAN.

Marketing Head

Dec 2022 - April 2024

The Institution of Electronics and Telecommunication Engineers (IETE).

- Identified potential sponsors and partners, creating sponsorship packages, and managing relationships to secure funding and support.
- Organised the first edition of our flagship event, BugBuster.

Projects

Gastronomic Illness Detection through Breath Analysis — Mini Project

- Interfaced MQ-series gas sensors with ESP32 to detect breath-based indicators of gastric illness.
- The microcontroller was programmed to capture and process sensor data via the UART/ADC channels.
- Demonstrated potential for low-cost noninvasive health diagnostics using IoT concepts.

Wireless Power Transfer — Major Project (Ongoing)

- Develop a wireless energy transmission system for contactless charging applications.
- Focus on matching circuit and regulated DC output.
- Involves working with simulation tools.

Workshops

Embedded Systems and IOT Workshop (Ongoing)

- Structured training on Embedded C, circuit design, and IoT communication protocols.
- Working on end-to-end embedded workflows — from schematic capture to firmware deployment.
- Designed to strengthen core electronics and embedded design skills for product-level development.

Baremetal C Workshop

- Attended a hands-on workshop on ARM microcontrollers.
- Learned register-level programming for GPIO, timers, and interrupts without high-level libraries or RTOS.

VLSI Workshop

- Implemented a simple down counter on the Artix-7 FPGA using Xilinx Vivado.
- Exposure to multiple FPGA platforms and architecture-level differences.

Skills

Programming Languages: Embedded C, Micropython, C, C++, Java, Verilog

Software/Frameworks: MATLAB, SciLab, Keil Microvision, LTSpice, NI Multisim, Thonny, Vivado, AutoCAD, COMSOL

Languages: English, Hindi, Marathi

Achievements

First place at Shark Tank Ideathon organized by Chemeics, VJTI
