## Projects

**Netflix Data Analysis – Python, SQL, Power BI**

**June 2025**

- Cleaned and transformed 8,800+ records from a Netflix dataset using Python (Pandas, NumPy), improving data integrity and analytical readiness.
- Wrote 12 SQL queries to analyze viewer trends by genre, content type, region, and director, supporting business decision-making.
- Performed audience segmentation by age groups (Kids, Teens, Adults) to reveal dominant genres and time-series trends in TV content production.
- Built interactive Power BI dashboards with slicers, KPIs, and line/bar charts to visualize content patterns and drive storytelling insights.

**Retail Order Analytics – Python, Power BI**

**June 2025**

- Generated a synthetic retail order dataset (customer, product, region, timeline) using Python, simulating realistic e-commerce operations.
- Structured dataset with categorical hierarchies (category, sub-category) and temporal features (order date, ship date) to enable deep analysis.
- Analyzed KPIs such as sales, profit, quantity, and discounts over time and region, enabling trend-based insights.
- Designed dynamic Power BI dashboards with drill-down filters and slicers for intuitive, executive-level data exploration.
