SUMMARY

Engineering student (2026) with a strong foundation in computer science, data structures, and scalable system design. Passionate about using technology and data to solve real-world problems. Over 1700+ DSA problems solved. Adept at full-stack development, API design, and distributed systems. Enthusiastic team player with a focus on ownership, integrity, and continuous learning — aligned with MSCF's mission to innovate and empower global investors through data and technology.

EDUCATION

B.Tech in Electronics and Telecommunication Engineering

Expected: May 2026

Sardar Patel Institute of Technology, Mumbai

Minors in Computer Science: Operating Systems, Database Systems, OOP, Computer Networks

SKILLS

Languages: C++, Python, TypeScript, JavaScript

Frameworks & Tools: React.js, Next.js, Node.js, MongoDB, Redis, Tailwind, Git, Docker, Postman

Systems & Concepts: REST APIs, Cloud-ready Architectures, SSR, Microservices, Distributed Systems

CS Foundations: Data Structures, Algorithms, OOP, Systems Design, Version Control

PROJECTS

Test My Case – Chrome DevTools Extension

[\[GitHub\]](#) [\[Demo\]](#)

Built a Chrome extension to simulate custom Codeforces test cases using JavaScript and DOM APIs.

- Reduced debugging time by 60% for 50+ users.
- Developed test simulation engine with modular architecture and sandboxed logic.
- Engineered support for dynamic input parsing and improved error visibility for user submissions.

PayNova – Full Stack Banking App

[\[GitHub\]](#)

Cloud-native platform using React, Next.js, Node.js, MongoDB.

- Implemented secure KYC and integrated Plaid Dwolla APIs for financial operations.
- Used Redis caching and async message queues for transaction logs and insights.
- Designed modular API services enabling reusability across user and transaction modules.

Here We Go – AI Trip Planner (Top 10 Hackathon)

[\[GitHub\]](#) [\[Demo\]](#)

Developed OpenAI + HERE Maps-based trip planner with auto-route generation.

- Applied Dijkstra A* for optimal planning and personalized suggestions.
- Deployed server-side rendered UI with Tailwind and Next.js.
- Collaborated in a 4-member cross-functional team to build the MVP in under 36 hours.

LEADERSHIP & VOLUNTEERING

Executive Technical Head, IETE SPIT (Jul 2023 – May 2025)

Led a 20-member team to organize flagship events like Codebuster and Bugbuster.

- Curated all problems for Codebuster, managed outreach and promotions, and ensured smooth execution with end-to-end ownership.
- Mentored team members and established workflows to maintain technical and operational quality across events.

ACHIEVEMENTS & CERTIFICATIONS

- Global Rank 14 in [CodeChef Starters 149 \(Div 3\)](#)
- Solved 1700+ problems across Codeforces (1360), LeetCode (1680), CodeChef (3 Star)
- Reliance Foundation Scholar (Top 0.5%)
- Finalist – HERE Technologies Hackathon 2024 (Top 10 India)
