Education

Sardar Patel Institute of Technology

Nov.2022 – July 2026

Bachelors of Technology in Electronics and Telecommunications, Minors in Computer Engineering

Mumbai, Maharashtra

Relevant Coursework

- Data Structures
- Data Algorithms
- Data Analysis
- Database Management
- Machine Learning
- Web Development
- OOPS
- Computer Architecture

Experience

Maas Tech Solutions

Nov. 2024 – Jan 2025

Web Development Intern

Mumbai, Maharashtra

- Revamped and optimized key sections of the company's production website to improve **visual appeal**, **mobile responsiveness**, and **overall user experience**.
- Implemented **modern web design practices** using HTML, CSS, and JavaScript to ensure consistency across browsers and devices.
- Worked closely with the design team to translate UI mockups into clean, accessible, and interactive web pages.

Projects

AI-Powered Doubt Solver Platform | Python, React.js, Google Collab

January 2025

- Developed a full-featured React web app that allows students to ask academic questions and receive AI-generated answers using Hugging Face's transformer models.
- Integrated Hugging Face Inference API directly from the frontend to generate natural language explanations using models like Falcon-RW and GPT.
- Designed a clean and responsive UI with Tailwind CSS, optimized for clarity and ease of learning for academic users.
- Implemented a topic extraction and quiz generation feature entirely on the client side using JavaScript and simple NLP logic.

QuickHire – Full Stack Job Portal | Spring Boot, React.js, MySQL VSCode

2024

- Developed and consumed **RESTful APIs** using Spring Boot to handle user authentication, job management, and application tracking.
- Implemented **JWT-based authentication and authorization**, securing both recruiter and candidate access paths.
- Integrated **MySQL database** for persistent job, user, and application data, using JPA and Hibernate ORM.

Mental Health in Tech – Data Analytics Project | Jupyter, Power BI

November 2024

- Analyzed survey data on mental health in the tech industry using Python (NumPy, Pandas) in Jupyter Notebook to uncover patterns related to workplace support, awareness, and mental health outcomes.
- Cleaned and preprocessed the dataset to handle missing values, normalize responses, and prepare it for analysis.
- Performed exploratory data analysis (EDA) to identify key trends across gender, age, company size, and mental health support policies.
- Visualized insights through a comprehensive Power BI dashboard featuring filters, trend graphs, and category-wise comparisons for deeper exploration.

Technical Skills

Languages: Java, Python, C, HTML/CSS, JavaScript, MySQL

Developer Tools: VS Code, Eclipse, Google Collab, Jupyter, Power Bi, Sandbox

Technical Skills/Frameworks: GitHub, React.js, Spring Framework, Machine Learning, Data Analysis

Leadership / Extracurricular

SPark

Jan 2023 - Dec 2023

Junior Correspondent

Sardar Patel Institute of Technology

- * Helped market the event through social media and engage with the audience
- * Helped organizing the main event by organizing and coordinating resources on the day of event.
