## EDUCATION

### Sardar Patel Institute of Technology

B Tech in Electronics and Telecommunication Engineering

Minor in Computer Engineering

Nov 2022 - Present

CGPA: 8.67

## PROJECTS

### Spatia | Typescript, Javascript, Python

May 2025 - May 2025

- Developed Spatia, a **Geographic Information System** tool for processing and visualizing complex spatial data.
- Implemented core spatial operations (**Buffer, Union, Intersection, Difference, Spatial Join**) with interactive before/after visualizations.
- Supports **GeoJSON, Shapefile, and WKT formats**, enabling seamless upload, processing, interactive map rendering and real-time visualization of spatial data.
- Integrated intuitive **UI features** such as clickable layers, toggle visibility, and dynamic zoom/pan, to make advanced geospatial analytics accessible to non-GIS users.

### SkillShare | Flask, Python

Mar 2025 - May 2025

- Designed a skill-sharing platform that enables users to connect and exchange skills, creating a **peer-to-peer learning ecosystem**.
- Generated an intelligent matching system using the epsilon-greedy algorithm to ensure optimal pairing of skill providers and seekers.
- Refined a **Reinforcement Learning-based feedback model** to continuously adapt matching accuracy based on user interactions and satisfaction scores.
- Built a Flask-based web front-end integrated with vector databases for efficient skill profile retrieval.

### Kisaan Mart | React.js, Node.js

Apr 2024 - Apr 2024

- Engineered direct-to-consumer e-commerce platform utilizing the MERN stack, enabling farmers to list products, manage inventory, and process transactions online.
- Directed an **interactive chat-bot** to assist farmers in learning about government schemes, providing real-time information and guidance.
- Integrated multilingual support by adding a page translation feature, enabling users to access the site in multiple languages, increasing inclusivity.
- Designed and deployed a leaderboard system to highlight trusted farmers and a personalized farm profile page showcasing farming practices and produce details.

### Biometric + OTP Multi-Factor Security System | Python, C++, Esp32

Feb 2024 - May 2024

- Achieved a biometric authentication system using ESP32 and C++, enabling verification via a fingerprint sensor.
- Simplified multi-factor authentication (MFA) by generating and sending an OTP via Telegram Bot after fingerprint verification, and validating the user's input on an integrated keypad before unlocking.
- Optimized firmware and backend logic, using C++ for ESP32 and Python for Telegram integration, ensuring seamless communication and security.

## SKILLS

**Languages:** Python, C, C++, MicroPython, Java

**Tools and Frameworks:** Django, Postman, FastAPI, React, Fast, Circuit Designing API

**Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, System Design, Operating Systems, Computer Networks, OOPS

## POSITIONS OF RESPONSIBILITY

### Research Cell, NMIMS | Committee Member

Aug 2022 - Dec 2022

- Coordinated and executed a 3-day research event with 5+ panel discussions, engaging over 200 students and faculty, ensuring smooth event logistics and participant engagement..
- Organized and facilitated multiple events aimed at enhancing students' research knowledge and skills, promoting cross-disciplinary collaboration and innovation.

## ACHIEVEMENTS

**HERE India Hackathon** - Secured 1st Runner-Up Position in the 30-Hour Hackathon

May 2025

**SE Hackathon, SPIT** - Finalists and were ranked among the Top 12 teams out of 50.

Apr 2024

**Sheryians Hackathon** -Finalist in the Sheryians HackathonDMCE's.

Jun 2024

**Data-Forge, SDC-SPIT** - Finalists in the AI/ML Hackathon and ranked 10 out of 50 teams .

Apr 2025

**YUKTI Innovation Challenge-2025** - Shortlisted among 50 teams on basis of mini project.

Jun 2025
