EDUCATION

XII (HSC)

K.M Agrawal College of Arts, Science and Commerce, Kalyan

2021 - 2022

61.00%

X (SSC)

Sri Vani Vidhyashala High School, Kalyan

2019 - 2020

75.35%

PROJECTS

Fashion Recommendation System - AWS, Node.js, Next.js, React.

March 2024 - May 2024

- Creating a Web app that will recommend customers various products based on their past purchases.
- Used Amazon Personalize which will train the model and give recommendations.
- Showing recommendations using Node.js and React.
- Decreased the training by 80 percent by using Amazon Personalize.
- Managed backend with MySQL for efficient data storage and retrieval.

Aethos - Python, Speech Recognition, OpenAI API, PyTorch, Tkinter/PyQt, Selenium

february 2024 - June 2024

- Developed an AI-powered voice assistant with speech recognition, text-to-speech, and wake-word detection for hands-free interaction.
- Integrated real-time application control and web search automation, enabling users to manage software and retrieve information via voice commands.
- Designed a futuristic UI using Tkinter/PyQt, enhancing user experience and interaction.
- Implemented an image generation module using OpenAI's API for AI-driven creative outputs.

INTERNSHIP AND ACHIEVEMENTS

- Internship In Core5 System and Services
- **Collaborated with cross-functional teams** to design and implement scalable solutions, ensuring alignment with client needs and operational requirements.
- **Gained hands-on experience in solution architecture**, enhancing my skills in evaluating and optimizing technology frameworks for enterprise environments.
- **Developed strategic problem-solving abilities** by analyzing complex systems, identifying areas for improvement, and proposing innovative solutions.
- Strengthened expertise in **architecture best practices**, including project lifecycle management, integration, and performance optimization, providing a solid foundation for future roles.
- Enhanced understanding of **cloud infrastructure and software integration**, focusing on designing systems that are both efficient and cost-effective.
- **Refined communication and stakeholder management skills** by collaborating with clients and technical teams to ensure solutions met both technical and business objectives.

SKILLS

Languages: Python, Java, JavaScript, SQL React

Platform: Linux, Amazon Web Services, Microsoft Azure, Docker Hub, MySQL

Tools: Git, GitHub, Kubernetes, Ansible, Docker, Terraform, Jenkins, Kafka

Frameworks: Postman, Node.js, Tailwind, Bootstrap
