Education

Sardar Patel Institute of Technology

Bachelor of Technology in Electronics and Telecommunication

Nov 2022 – Jun 2026

CGPA-8.32

Work Experience

Sports Committee of S.P.I.T.

Senior Executive Head

May 2023 – Apr 2025

- Managed operations for 10+ large-scale events, utilizing Excel and SQL-based tracking systems to monitor budgets, logistics, and participant data, improving operational efficiency by 20%.
- Conducted data analysis on event participation trends (1,500+ students), providing actionable insights that informed resource allocation and vendor negotiations, reducing costs by 15%.
- Designed dashboards for attendance, budget, and scheduling KPIs, enabling the committee to make data-driven decisions during Spoorthi '25, a 10-day intercollegiate festival with 500+ participants.

Allegient Unified Technology, New Delhi

Marketing Intern

May 2024 – Jul 2024

- Engaged with 20+ stakeholders daily, fostering long-term relationships and improving decision-making through customized data-driven solutions, demonstrating strong interpersonal and analytical skills.
- Using SQL, Python, and financial modeling techniques to perform data-driven analysis, enhance customer segmentation, and increase operational efficiency, aligning with business objectives.

Projects

Banking Sector Analytics DashBoard

Mar 2025 – Apr 2025

- Designed and deployed an interactive Power BI dashboard to track key banking KPIs (deposits, savings, loans, foreign currency accounts), enabling executives to monitor performance in real time.
- Implemented advanced filtering and gender-based segmentation features, supporting targeted marketing campaigns and customer retention strategies.

Land Classification Using Satellite Imagery

Jan 2025 – Mar 2025

- Built supervised machine learning models (Random Forest, SVM, and Decision Tree) to classify land cover types using Sentinel-2 satellite imagery.
- Band indexing techniques (NDVI, EVI, NDBI, BSI) implemented for feature engineering, improving classification accuracy by 12%.
- Evaluated models using precision, recall and F1 score metrics, selecting Random Forest as the most robust classifier for land cover prediction.

Automated Lung Disease Detection Using Chest X-ray Imaging and ML

Jan 2024 – May 2024

- Developed a Convolutional Neural Network (CNN) model achieving 98% accuracy on chest X-ray images using a Kaggle data set of 500+ samples.
- Automated the data pipeline with IoT integration (ESP32), enabling real-time image acquisition, preprocessing, and inference in clinical-like settings.
- Conducted a model evaluation with precision, recall and F1 score metrics to ensure robustness, reliability, and potential for healthcare system deployment.

Achievements

- **National Finalist**, Case Crunch: Case Study Competition, NIT Rourkela – **Secured 6th position** in the final round among **300+ teams** from across India.
- **National Finalist**, Marketing Challenge: Case Study Competition, MPSTME, NMIMS – Ranked in the **Top 5** of the final round among **800+ teams** nationwide.
- **Camp Leader**, Army Division – National Cadet Corps – Led peers in **disciplined, high-responsibility** environments.
- **Team Captain**, 2nd Runner-Up – Agility Cup Intercollege Cricket Tournament – Demonstrated **leadership** and **team management** under competitive pressure.

Skills

Languages Python, MySQL, C++

Framework TensorFlow, PyTorch, Scikit-learn

Concepts ML, DL, Data Preprocessing, Model Tuning

Tools Power BI, Excel, MS PowerPoint, Git
