SUMMARY

Final-year engineering student passionate about AI/ML and software development, with strong problem-solving abilities and a solid understanding of data structures, algorithms, and object-oriented programming. Proficient in Python and well-versed in machine learning algorithms, model training, and data preprocessing. Eager to contribute to the development and integration of AI-driven solutions. I thrive in fast-paced teams that value ownership, innovation, and continuous learning.

EDUCATION

Sardar Patel Institute of Technology (S.P.I.T)

B.Tech in Electronics and Telecommunication Engineering

• Minor in **AI&ML and DBMS**

Expected July 2026

Jan 2024 – Present

SKILLS

Technical Skills

- Programming Languages: Java, Python, C++, C, Kotlin
- Machine Learning & NLP: TensorFlow, Scikit-learn, NLTK, text vectorization, supervised learning
- Web & App Development: HTML, CSS, JavaScript, Android Development, RESTful APIs, Socket.IO
- Databases: MySQL, Firebase Realtime Database
- Developer Tools: Git, GitHub, Android Studio, Postman, Google Colab
- Cloud & Deployment: Firebase (Cloud Storage, Authentication), API testing & documentation

PROJECTS

Personalized ML Response Model | *Python, TensorFlow, Scikit-learn, NLTK*

GitHub

- Built an ML pipeline to mimic individual writing styles using NLP techniques for human-like communication.
- Preprocessed and vectorized text data to capture semantic and syntactic patterns for supervised training.
- Leveraged NLTK and Scikit-learn for tone analysis, context understanding, and feature extraction.
- Tuned model hyperparameters to optimize linguistic accuracy and response relevance.
- Integrated the model into chatbot platforms to enable real-time, personalized user interactions.

Real-Time Chat Application | *Kotlin, Android Studio, Firebase, Socket.IO*

GitHub

- Built a real-time messaging app using Socket.IO to handle dynamic data flow across user sessions.
- Designed a scalable backend for reliable message routing, delivery tracking, and status syncing.
- Integrated Firebase for secure cloud storage and real-time data synchronization across devices.

API-Centric Task Management System | *Java, Spring Boot, MySQL, Postman, Git*

- Engineered robust RESTful APIs for task creation, updates, deletions, and role management, ensuring secure and efficient operations.
- Built the backend with Java, Spring Boot, and MySQL to enable reliable data persistence and scalability.
- Validated endpoints using Postman and produced developer-friendly API documentation for seamless integration.

POSITION OF RESPONSIBILITIES

- Class Representative (2022–Present) Certificate
Represented 60+ students, coordinated with faculty, managed class activities, and ensured smooth communication.
- Mentored junior students on academic planning, project execution, and adapting to college life, enhancing their academic success and confidence.

EXTRA-CURRICULAR ACTIVITIES

- Passionate about reading fiction and non-fiction books, especially short stories and personal development and productivity.
- Enjoy playing chess and other strategy games
