Education

Sardar Patel Institute of Technology

Nov 2022 – Jun 2026

B.Tech Computer Engineering

CGPA: 8.2

K J Somaiya College of Science and Commerce

Jun 2021 – Mar 2022

Higher Secondary Certificate

Grade: 90%

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Big Data Analytics
- Operating Systems
- Software Engineering
- Database Management
- Web Development
- UXD

Projects

Opportunix | *React.js, Python, Fast-API, MongoDB*

- [Link](#)

- Built an AI-Powered Career Growth & Recruitment Platform with features like Interview Simulator, Skill Gap Analyzer, and Resume Builder
- Developed competency classification model utilizing logistic regression with TF-IDF vectorization to classify interview responses into technical competency levels
- Implemented multi-modal mock interview analysis combining facial expression, audio tone, and semantic response evaluation
- Built a Skill Gap Analyzer using BERT-based NER, Sentence Transformers, and clustering to recommend personalized learning paths
- Integrated visualization dashboards using Plotly and Streamlit for skill mapping and performance feedback

StreamiFy | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Postman*

- [Link](#)

- Built a full-stack social media application with real-time chat and video calling using getstream.io APIs
- Implemented JWT-based authentication for secure login, signup, and protected routes ensuring data privacy
- Employed Postman for comprehensive API testing to validate seamless integration.
- Utilized TanStack Query for efficient data fetching and state management to enhance performance
- Developed custom React hooks for authentication flows, API integration, and state logic

CarePulse | *Next.js, Node.js, TypeScript, TailwindCSS, Twilio*

- [Link](#)

- Built a full-stack patient management platform enabling users to book appointments with doctors in real time
- Integrated Twilio SMS API to send automated appointment reminders and real-time notifications to patients
- Used ShadCN UI components for creating a clean and accessible user interface tailored for healthcare workflows
- Managed patient data and appointments using efficient routing

HelpingHands | *HTML, CSS, JavaScript, Node.js, Express.js, MongoDB*

- Built a Charity Donation Platform with leaderboard as a gamification element
- Designed and implemented a responsive, user-friendly interface with a clean and accessible UI
- Integrated interactive data visualizations to provide clear and informative real-time donation statistics
- Automated digital receipt generation for all successful transactions to enhance donor transparency

Skills

Languages: C++, Java, HTML/CSS, SQL

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Hadoop

Development Tools: Git/Github, Postman, MongoDB, MySQL, Tableau

Leadership

Mini-Project | Team Lead

- Led a team of 3 members with diverse skill sets, ensuring effective collaboration and project ownership
- Oversaw task allocation, time management, and planning to ensure timely and efficient project delivery
- Resolved technical and interpersonal issues, maintaining team harmony and workflow consistency

Achievements

- Tackled **1500+** DSA problems across platforms like LeetCode, GFG and Codeforces
- Qualified for the 2024 **CodeUncode Regionals** Round by securing a top **50 rank** among 300+ participants
