2020

Mumbai

Skills and Technologies

Programming Languages: C++, Java, JavaScript, Python

Tools: Git/GitHub, Figma

Databases: SQL, MongoDB

Frameworks: Node.js, React

Libraries: Bootstrap, Material-UI, Tailwind, ShadCN

Projects

AI Termsheet Validator | *Flask, Node*

GitHub

- Developed a termsheet validator for fast and automated termsheet analysis
- Integrated automatic email retrieval for streamlined flow. Used GrokCloud APIs for effective analysis of documents
- Implemented document version control to ensure proper tracking of changes in different document versions

Options Pricing Model | *Python, SQL, Javascript, HTML*

GitHub

- Developed a mathematical model to predict the theoretical price of real-world option contracts using the BlackScholes Model.
- Adapted the Monte Carlo Simulation to run approximately 1 million simulations for accurate results.
- Used Upstox API to get realtime data.

AI-Powered LMS for Under-Resourced Schools | *React, Node, Express, MongoDB*

GitHub

- Developed an end-to-end learning platform to support schools with limited faculty and resources, addressing a real-world challenge posed by UBS.
- Enabled seamless onboarding, live/recorded lectures by volunteers, and multilingual content access for students across India.
- Integrated AI tools for automatic PPT generation, PDF summarization, and doubt resolution via chatbot.

Certifications and Awards

ICPC Regionalist 2024 (Kanpur Onsite AIR-86)

Code Uncode 2025 - 5th Place

Rated - 1655 Expert on Codeforces
