EDUCATION

- Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology** Mumbai, India
Bachelor of Technology - Computer Engineering; CGPA: 7.66 November 2022 - Present
Courses: Operating Systems, Data Structures, Algorithms, Database Management Systems, Distributed Computing, Theory of Computation, Artificial Intelligence and Machine Learning
- Mulund Vidya Mandir Junior College** Mumbai, India
Higher Secondary Certificate (HSC) - Science; Percentage: 76% September 2020 - May 2022

SKILLS SUMMARY

- Languages:** Python, Java, C, JavaScript, SQL
- Frameworks & Libraries:** React, FastAPI, Node.js, LangChain, Android SDK
- Databases:** MySQL, PostgreSQL, SQLite, Firebase
- Tools & Technologies:** Docker, Git, Linux
- Design & Prototyping:** Figma, Blender
- Development Platforms:** Linux, Android, Web
- Soft Skills:** Problem Solving, Adaptability, Collaboration

PROJECTS

- BookSense — Semantic Book Recommender — LangChain, HuggingFace, Gradio, Python:** Developed a semantic book recommendation system using open-source embeddings and vector similarity.
 - Addressed user frustration with generic book recommendations by enabling natural language queries for personalized suggestions.
 - Defined the semantic search pipeline and user interaction flows, focusing on intuitive query understanding and contextual relevance.
 - Engineered a Retrieval-Augmented Generation (RAG) system using LangChain and Hugging Face embeddings for scalable content-based retrieval.
 - Applied prompt engineering with LLMs to enrich recommendations with contextual relevance, significantly improving user experience for book discovery.
- ResearchX — Open-Access Repository for Research Papers — React.js, FastAPI, PostgreSQL:** Developed a research paper management platform with submission, search, and analysis features.
 - Simplified research paper management and discovery for users by providing submission, advanced search, and AI-powered analysis features.
 - Defined core functionalities including user submission workflows, search filters, and the integration of NLP-driven features.
 - Implemented automated citation extraction and summary generation using NLP, significantly reducing manual effort for researchers.
 - Developed an NLP-based chatbot to provide instant answers to paper-related questions, enhancing user engagement.
- FoodEase — Mobile Food Pickup Application — Android Studio, Java, Firebase:** A Mobile Food Pickup App for browsing, ordering food in college canteens.
 - Streamlined the food ordering and pickup process for college students, reducing wait times and improving convenience in canteens.
 - Designed an intuitive food ordering interface tailored for college canteen environments, focusing on seamless browsing and order placement.
 - Implemented Firebase for real-time data management for menus, orders, and user preferences.
 - Optimized app performance to reduce load times and ensure smooth user interactions, enhancing the daily experience for students and canteen staff.

CERTIFICATIONS

- Build Your Own GPT from Scratch** July 2025
Vizvara
 - Completed a hands-on course covering transformer architectures, training loops, and tokenizer pipelines.:
- Generative AI Fundamentals** July 2025
Vizvara
 - Gained foundational understanding of LLMs, diffusion models, prompt tuning, and generative applications.:
