🐙 github.com/u-r-a-bot

Aspiring computer engineering student passionate about artificial intelligence and machine learning, seeking opportunities to apply technical knowledge and innovative thinking to solve real-world problems.

Education

Sardar Patel Institute of Techonology

Btech in Computer Science

Nov. 2022 – May 2026

Mumbai, Maharashtra

Lakshya Prep High School and Junior College

Higher Secondary Certificate

May. 2020 – July 2022

Kalyan, Maharashtra

Sri Vani Vidyashala High School

Secondary School Certificate

June. 2019 – July 2020

Kalyan, Maharashtra

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Machine Learning
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

Shree Siddhi Women's Hospital

Software Engineer Intern

July 24- December 24

Dombiwali, Maharashtra

- Developed a comprehensive hospital management system with modules for appointment booking, accounting, and inpatient department management.
- Implemented a FastAPI backend with PostgreSQL database integration for handling patient data, appointments, billing, and inpatient records.
- Configured local DNS and internal networking to support reliable client-server communication within the hospital system.
- Utilized JWT authentication for securing API routes and implemented role-based access control for different hospital staff.
- Created financial reporting dashboards in the accounting module that automated monthly financial summaries.

Projects

Medical Triage Agent | *LangGraph, Gemini, FAISS, HuggingFace, Streamlit*

April 2025

- * Built AI-driven medical triage system with LangGraph and Gemini LLM integration
- * Integrated RAG pipeline using FAISS and HuggingFace for 41 medical conditions
- * Created interactive Streamlit web interface with real-time conversation tracking and dynamic triage recommendations
- * Implemented NLP-based patient information extraction for symptoms, severity, and medical context analysis

SaaS Automation Platform | *React Flow, FastAPI, Firebase, Google APIs, Slack API*

February 2025

- * Built a no-code automation platform with Gmail, Calendar, Slack, and Drive integrations
- * Enabled auto email parsing, event scheduling, Slack alerts, and attachment backups
- * Designed a drag-and-drop UI for customizable workflows using React Flow
- * Used background tasks to manage async services like email triggers

Endangered Bird Species detection using audio | *PyTorch, Librosa, Audio Processing, Flask, BirdClef*

May 2024

- * Created a web application using Flask, HTML, CSS and JavaScript.
- * An Audio Processing pipeline was implemented using Librosa which could process audio to required format
- * The Processed audio is then fed into a Deep Learning model made using PyTorch
- * Predictions Obtained through model are displayed, along with the GeoLocations obtained through the dataset

Car Rental website | *Python, FastAPI, MySQL*

November 2023

- * Developed a website with HTML, CSS which shows available cars for rental
- * Implemented a MySql DataBase which records all transanctions made by the user

Technical Skills

Programming Languages: Python, C++, C, SQL, Javascript

Frameworks & Libraries: FastAPI, PyTorch, React.js, Lightning AI, Librosa

Web Development: HTML, CSS, JavaScript

Developer Tools: VS Code, Jupyter Notebook, Git

Machine Learning: RAG, LLM Integration, Audio Processing, Computer Vision

Languages: English, Marathi , Hindi
