EDUCATION

Sardar Patel Institute of Technology

B.Tech in Computer Engineering, CGPA: 9.97

Mumbai, India

Aug 2022 – Present

SPJIMR SP Jain Institute of Management and Research

Minor in Management

Mumbai, India

Feb 2024 – Present

EXPERIENCE

SDE Intern

Mar 2025 – Jun 2025

Six Ladders

Mumbai, India

- Founding engineer of Ladder1 (B2C) - built gamified DSA platform with personalized roadmaps, proctored exams, and automated certificate generation
- Developed role-based email notification system for B2B LMS covering quizzes, submissions, and content updates
- Implemented RBAC and OAuth (Google, GitHub), optimizing backend scalability, APIs, queries, and auth flows.

Machine Learning Intern

Nov 2024 – Jan 2025

Feyn Labs

Guwahati, India (Remote)

- Built ML models for predictive maintenance and inventory forecasting, optimizing repair schedules for SMBs
- Engineered customer segmentation for Indian EV market, increasing sales by 16% through targeted engagement

PROJECTS

AI-Powered Career Growth Platform | *FastAPI, React.js, MongoDB, Supabase, BERT*

2025

- Built a full-stack AI platform for real-time interview simulations, skill gap analysis, and smart resume management
- Developed multi-modal interview assessment using facial emotion recognition (FER), audio analysis (Librosa, Whisper), and semantic evaluation (BERT).
- Designed a skill gap analyzer using NER, SentenceTransformers, DBSCAN clustering, and graph-based modeling.
- Secured document storage via Supabase with encrypted access and integrated an AI-powered resume builder.

Plane Crash Search using Bayesian Search Theory | *Django, LeafletJS, Pygame, Bayesian Theory*

2024

- Simulated plane crash search using Bayesian Search Theory, A* Algorithm, and KDE with CSV export.
- Integrated Django backend, LeafletJS for geospatial visualization, Selenium for automated data retrieval, and Meteomatics API to access wind and ocean wave velocities for algorithmically backtracking recovered debris.
- Converted gathered geographic and flight data into meaningful probability distributions, and performed visualisation with Seaborn and Matplotlib to provide insights to the Search and Rescue Team.

Conversational RAG Bot | *Langchain, HuggingFace, Groq API, Ollama, FAISS*

2024

- Built a conversational RAG bot with chat history using Langchain, HF embeddings, and Groq/Ollama LLMs.
- Used FAISS to store document chunk embeddings and perform similarity search; passed retrieved context and user input to the LLM to improve response relevance.

SKILLS

Languages: Python, C, C++, Java

Systems & Web: Linux CLI, MySQL, MongoDB, HTML, CSS, React.js, Next.js, Django, Flask, Express.js

Frameworks: TensorFlow, Pytorch, Langchain, Scikit-learn, Numpy, Pandas, Matplotlib, Seaborn, Pygame, Selenium

Specializations: Machine Learning, Transformers, OCR, NLP, Computer Vision, RAG Pipelines

Tools: Git, Docker, Postman, FAISS, HuggingFace, OpenCV

Soft Skills: Leadership, Communication, Problem Solving, Adaptability, Time Management

ACHIEVEMENTS

NPTEL Top 1% National Topper: Machine Learning & Soft Skills courses

1st Position in F.Y. and S.Y. BTech Computer Engineering at SPIT

Top 12 Placement in S.P.I.T. S.Y. Hackathon for Fashion Recommender System

MHT-CET 100%ile, JEE Mains 99.53%ile
