EDUCATION

- Sardar Patel Institute of Technology** Mumbai, India
Bachelor of Technology - Computer Engineering; CGPA: 9.1 November 2022 - June 2026
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
- SP Jain Institute of Management and Research** Mumbai, India
Minor in Management Jan 2024 - Dec 2025
Courses: Finance & Cost Accounting, Supply Chain Operations, Project Management, IT for Business

WORK EXPERIENCE

- SmowCode** Remote
Server Developer Intern June 2025 - July 2025
 - Automated Build File Structure for STM32:** Designed and implemented a backend system using **Node.js** and **Grunt** to generate project-specific folder structures and files—both static and dynamically created—for STM32 microcontroller builds, enabling smooth conversion to `.bin` and `.elf`.
 - Collaboration in Microcontroller SaaS Server Development:** Worked with API and toolchain teams to integrate STM32 support into a cloud-based SaaS platform, aligning file generation workflows with existing ESP microcontroller infrastructure.
- TradZlah LLP** Remote
Freelance Web Developer Jan 2025 - Mar 2025
 - Website Development:** Delivered a fully responsive business website using **Wix Studio**, aligned with client branding and optimized for all devices.
 - Client-Facing Features:** Integrated **Tidio chatbot** for real-time FAQs and lead capture; collaborated with the client for iterative improvements.

PROJECTS

- Journalize – A Digital Journal Platform** *Spring Boot, Spring Security, React, MongoDB, Google OAuth 2.0*
 - Built a full-stack digital journaling app with secure login, Google OAuth integration, and PDF export, improving offline accessibility.
 - Achieved 100% login and journal creation success under load testing with 300 concurrent users using k6.
 - Maintained <2s 95th percentile API response time under peak load across all endpoints.
 - Built a responsive UI with React and managed backend operations using Spring Boot and MongoDB.
- Violence Detection using Deep Learning and Transformers** *Python, TensorFlow, PyTorch, OpenCV*
 - Developed a deep learning pipeline for detecting violent scenes in videos, enabling improved content moderation.
 - Implemented and evaluated ConvLSTM (81.47%), LRCN (93.75%), and ViViT Transformer (88%) architectures.
 - Processed video frames with OpenCV and applied temporal modeling for robust sequence learning.
 - Benchmarked models using precision, recall, and F1-score; visualized predictions to enhance interpretability.
- SynergyHub – Remote Collaboration Platform (In Progress)** *Spring Boot, ReactJS, Docker, RabbitMQ, PostgreSQL*
 - Built the Advanced Project Management module which supports task creation, assignment, sprint planning.
 - Used RabbitMQ for asynchronous task execution.
 - Applied JWT authentication, role-based access control, and RESTful APIs.
 - Containerized services with Docker to enable consistent deployment.

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript, SQL
- Libraries & Frameworks:** Spring Boot, ReactJS
- Databases:** PostgreSQL, MySQL, MongoDB
- Tools:** Docker, Git, Postman

ACHIEVEMENTS & CERTIFICATIONS

- JPMC Code for Good Hackathon 2025:** Selected from over 50,000 applicants to participate in J.P. Morgan Chase's prestigious Code-for-Good hackathon. Collaborated with a team to build a solution for real-world problem for a partnering NGO.
- HacktoberFest 2024:** Contributed to 4 open source projects during HacktoberFest 2024. Key contributions included UI and security upgrades, implementing CRUD operations in Spring Boot modules, and database schema refactoring.
- Java Spring Framework 6 with Spring Boot 3:** Completed Udemy course covering Core Java, Spring Boot, Spring Core (IoC), MVC, AOP, JPA, REST, Security, Docker, and Microservices for building scalable Java applications.
