Education

Sardar Patel Institute Of Technology, Mumbai — Bachelor of Technology in Computer Engineering
◦ 2022 – 2026 — **CGPA: 8.19/10**

D.G. Ruparel College of Arts, Science and Commerce, Matunga
◦ 2020 – 2022 — **HSC (Class XII): 81.5%**

Skills

Languages: Java, C/C++, Python, JavaScript, SQL, HTML, CSS

Frameworks: React.js, Node.js, Express.js, Flask, TensorFlow

Tools & Technologies: Git, GitHub, VS Code, Hadoop

Cloud & Databases: MongoDB, MySQL, AWS

Relevant Coursework: Big Data Analytics & Visualization, Data Structures & Algorithms, Software Engineering, Operating Systems.

Projects

Tomato Food Ordering App — ReactJS, NodeJS, ExpressJS, MongoDB, Stripe

[Link](#)

- **Developed** a full-stack food ordering platform to **streamline** the user experience & **reduce cart abandonment by 25%**.
- Implemented **secure payment** processing with **Stripe**, and integrated **JWT authentication** for secure user sessions.
- Built a **responsive frontend** and an **admin panel** for restaurant management, featuring **dynamic shopping cart** functionality.

Spring Boot MVC - Employee Management System — Spring Boot, Thymeleaf, MySQL, RESTful APIs

[Link](#)

- Developed a **secure employee management system** using **Spring Boot** and Thymeleaf to improve data management efficiency.
- **Increased data integrity by 30%** by implementing robust **CRUD operations** and **Spring Security** for authentication.
- Streamlined workflows by designing **RESTful APIs** and ensuring persistent data storage with **MySQL integration**.

Diabetic Retinopathy Prediction from Fundus Images — Python, Keras, TensorFlow, Flask

Ongoing

- **Engineered** a **CNN model** to analyze retinal fundus images, attaining **92% accuracy** in detecting five stages of retinopathy.
- Developed a **secure Flask web application** for image analysis and management, complete with user **authentication**.

Air Quality and Pollution Analysis Dashboard — Tableau

[Link](#)

- Designed an **interactive Tableau dashboard** for real-time AQI monitoring, using public data to **identify key pollutants**.
- Integrated regional filters and **dynamic time-series visualizations** to empower stakeholders to track pollution hotspots.

Relevant Experiences & Achievements

Advanced Problem Solving (Data Structures & Algorithms)

[Link](#)

- Demonstrated strong problem-solving skills by successfully solving **600+ DSA questions** on LeetCode, GFG, and CodeForces.

CFI — Accounting Fundamentals Course

- Gained proficiency in the role of financial statements like balance sheet and income statement.
