EDUCATION

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Mumbai, Maharashtra

Nov. 2022 – Jun. 2026

N.M.F College of Commerce and Science

Higher Secondary Certificate in Science

Mumbai, Maharashtra

Jun. 2020 – May 2022

EXPERIENCE

Software Development Engineer Intern

Vyaasa AI

Aug. 2025 – Present

Mumbai, India

- Developed robust GraphQL API endpoints using NestJS framework to enhance backend system performance and data querying efficiency
- Architected and implemented scalable multi-tenant backend systems handling complex business logic for diverse client requirements
- Collaborated with cross-functional teams in a fast-paced startup environment to deliver high-quality software solutions within tight deadlines
- Gained extensive experience in modern backend development practices, system architecture design, and startup product development lifecycle
- Contributed to frontend development initiatives while maintaining focus on backend API development and system optimization

Technical Lead

Women in Engineering Society, SPIT

Jun. 2023 – Nov. 2024

Mumbai, India

- Led technical development for 3 hackathons with 500+ participants each, creating QR-based attendance tracking and food allocation systems
- Engineered secure project submission portal with team registration, file upload capabilities, and real-time judging dashboard serving 150+ teams
- Reduced manual event operations by 60% through custom workflow tools and improved overall event efficiency by 45%
- Managed cross-functional team of 5 developers and coordinated with 10+ event organizers to deliver technical solutions on schedule

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, HTML, CSS, SQL, TypeScript

Frameworks and Libraries: React.js, Next.js, Node.js, NestJS, FastAPI, Express.js, Tailwind CSS, GraphQL

Databases: PostgreSQL, Supabase, MongoDB, MySQL

Tools and Technologies: Git, GitHub, Visual Studio Code, Grafana, Docker, Vercel, Netlify

Specializations: Full Stack Development, API Development, Backend Architecture, Machine Learning, Web Scraping, Real-time Applications

PROJECTS

Observe - API Monitoring Platform | *Python, Machine Learning, LGTM Stack*

Feb. 2025 – May 2025

- Architected AI-powered API observability platform for Barclays with real-time traffic monitoring and anomaly detection capabilities serving 100+ microservices
- Deployed LGTM stack (Loki, Grafana, Tempo, Mimir) for centralized logging, metrics collection, distributed tracing, and alerting processing 10M+ requests daily
- Trained machine learning models to identify abnormal traffic patterns with 95% accuracy and trigger instant developer alerts within 30 seconds
- Reduced API downtime by 40% through early detection and response system, saving an estimated \$50K+ in potential revenue loss
- **GitHub Repository**

Webster - Business Management SaaS | *Next.js, Supabase, AI Integration*

Jan. 2025 – Present

- Constructed comprehensive SaaS platform with client management, task tracking, project timeline management, and drag-and-drop website builder
- Integrated 3 AI agents for task management, content generation, and user onboarding assistance, reducing manual workload by 50%
- Established role-based access control, real-time collaboration features, and custom dashboard analytics supporting 20+ concurrent users
- Achieved 90% user satisfaction rate through intuitive interface design and seamless workflow tools based on feedback from 25+ beta testers
- **GitHub Repository**

JOB WE MET - Remote Interview Platform | *Next.js, WebRTC, Stream SDK* Jun. 2024 – Dec. 2024

- Created comprehensive job platform with remote video interviews, live coding assessments, and job application system serving 200+ active users
- Integrated Stream SDK for high-quality video interviews and Monaco Editor for real-time collaborative coding tests with 99.5% uptime
- Deployed web scraping system to aggregate 1,000+ job listings from 5 external portals and enabled recruiter job posting functionality
- Engineered comprehensive interview dashboard with recording capabilities, candidate evaluation tools, and scoring algorithms reducing hiring time by 35%
- **GitHub Repository** | **Live Demo**

ACHIEVEMENTS AND AWARDS

Software Development Engineer - Barclays, Pune — Full-time offer starting Jul. 2026

Winner - Barclays Hack-o-Hire Competition 2025 — Created AI-powered API monitoring and alert system among 500+ participants

Runner-up - Airawat 2.0 Hackathon 2025 — Developed Finius financial advisor for budget and expense management

Best Solution Award - CSI-SPIT Odyssey Hackathon 2025 — Outstanding technical approach and implementation

Winner - RGIT CODEASTRA Programming Competition 2025 — Competitive programming and algorithm optimization

Winner - IEEE Bombay Section E-Waste Conclave 2024 — Sustainable technology solution for electronic waste management

Runner-up - SM Parekh Inter-College Debate Competition 2022 — Public speaking and argumentation skills
