EDUCATION

Sardar Patel Institute of Technology

Btech | Computer Engineering

8.31 CGPA

2022 - present

EXPERIENCE

Reliance Jio

July 29, 2024 – August 30, 2024

Software Development Intern

Mumbai

- Built a full-stack **Document Management System** using **Angular**, **Spring Boot**, and **MySQL**, improving document **retrieval** efficiency and **automating** key workflows.
- Worked on features such as intelligent **document retrieval**, context-aware **parameter filtering** and comprehensive user **lifecycle management** for over **1000+** records.
- Created and tested **RESTful APIs** for efficient integration, leveraging **Postman** for validation and optimizing queries to reduce response times, documented workflows for clarity, handovers, and team collaboration.

PROJECTS

ReviewPulse | *Machine Learning, Natural Language Processing*

- Implemented a sentiment analysis pipeline on **1 Lakh+ IMDB reviews**, applying **NLP techniques** with **NLTK** for **preprocessing** to **reduce** noise by **15%**, and performed **EDA** to **visualize** sentiment **trends**, **histograms**, **word clouds**.
- Applied **TF-IDF** feature engineering, **15,000+** **features** for model training. Trained and optimized models selecting SVM as the best-performing model.
- Enabled real-time predictions with **SHAP** and **LIME** explainability and set up a deployment-ready AWS Elastic Beanstalk environment via AWS CLI

EcoStock | *MERN, GenAI*

- Developed a full-stack **Inventory Management System** featuring an interactive **dashboard** for **stock analytics**, trend monitoring, and top-selling item insights.
- Integrated Excel-based input handling, smart alerts, and a **calendar-based** forecasting module to **automate** inventory planning and replenishment.
- Aims to significantly minimize stock waste by promoting **sustainable** stock practices through **predictive insights** and **data-driven automation**.

SKILLS

Languages: C++, Java

Web Development: Html, CSS, TailwindCSS, Javascript, React, Node, Express

Databases: SQL, MongoDB

Tools: Github, Figma, Latex, Postman, PowerBI

POSITIONS OF RESPONSIBILITY

Head Of Operations at Oculus SPIT

August 2023 - June 2024

Led a 40+ member team to manage college fests across two years, driving logistics, outreach, and strategic execution.

ACHIEVEMENTS

- Placed in the **Top 50** among 100+ teams in a Hackathon hosted by the Google Developers Club. 2024
- **Ranked** amongst the **Top 10** in a Hackathon conducted by Here Technologies. 2025
