Education

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Engineering — CGPA: 8.31/10

Nov. 2022 – July 2026

Mumbai, Maharashtra

Objective

A highly driven Computer Engineering student with a strong academic foundation and a passion for solving real-world problems using technology. Committed to continuous learning and innovation, with the goal of contributing meaningfully to dynamic projects while growing professionally in a collaborative environment.

Technical Skills

Languages: C, C++, Java, Python, SQL, JavaScript

Frameworks: React, Node.js, Express.js, Flask, Bootstrap, Tailwind CSS

Databases: MySQL, MongoDB

Developer Tools: Git, VSCode, Google Colab, Figma

Soft Skills: Teamwork, Problem Solving, Critical Thinking

Experience

Web Developer Intern

March 2025 – April 2025

Gyan Pvt. Ltd.

Remote

- Contributed to the backend of an internship management system using Django for resume screening and applicant tracking
- Developed features such as resume upload, admin approval workflows, and status tracking
- Integrated email notifications for application status updates
- Designed RESTful APIs consumed by both admin and student portals

Projects

BookNest | React, Node.js, MongoDB

- Developed a responsive MERN-based platform for book discovery and online purchasing
- Built secure user authentication and APIs for real-time listings and cart updates
- Developed user profile management with update functionality for seamless account handling
- Implemented custom JWT-based authentication and secured protected routes for authorized access

ShopSense-ML: Smart Retail & Forecasting Toolkit | Python, Flask, React, MySQL

- Developed a full-stack ShopSense-ML retail platform using Flask (backend), React (frontend), and MySQL, featuring secure clerk-based login and registration for store-specific access
- Enabled store owners and staff to manage inventory, update stock levels, and monitor key metrics through a dashboard with multi-store support
- Implemented automated notifications (email/SMS) for low stock and batch expirations using Twilio, ensuring timely inventory actions
- Integrated XGBoost for accurate sales forecasting, enabling data-driven decision-making and dynamic pricing to maximize profitability.

Health Hub | Next.js, Node.js, MongoDB, LangChain, ChromaDB, Mistral API

- Developed an AI chatbot using Retrieval-Augmented Generation (RAG) with Mistral LLM, integrated with PubMed for real-time medical insights
- Implemented role-based authentication and a Doctor Appointment Booking System to enhance healthcare accessibility
- Designed a secure Electronic Health Records (EHR) system allowing doctors to access and manage patient history

Achievements

Ranked in the **Top 10 teams out of 200+** at **Hackverse 2025** for delivering an innovative tech solution under tight deadlines

Achieved a **State-level rank of 1022 out of 200,000+** in **MH CET** and qualified **JEE Advanced**, reflecting strong analytical abilities

Extracurricular Activities

- Member of Sports Committee – Assisted in organizing inter/intra-college sports events and coordinating logistics
- Participated in beach clean-up drives to promote environmental awareness
