Education

- | | |
|---|--|
| • Sardar Patel Institute of Technology-University of Mumbai
<i>Bachelor of Technology in Computer Engineering</i> | <i>Dec 2022 – Aug 2026</i> |
| • Chinmaya Vidyalaya Tarapur, Mumbai | <i>(CBSE XII) 89.6% June 2021 – May 2022</i> |
| • Chinmaya Vidyalaya Tarapur, Mumbai | <i>(CBSE X) 90.6% June 2019 – May 2020</i> |

Projects

Robust Deepfake Detection

Feb 2025 – June 2025

- Built a full-stack deepfake detection platform using Next.js, Tailwind CSS, and Python, enabling real-time image/video analysis with secure authentication.
- Integrated a hybrid deep learning model (XceptionNet + DCTConv + Attention Fusion) to achieve high-accuracy detection of deepfakes.
- Delivered a responsive, smooth UI using Framer Motion and Tailwind CSS, enhancing user experience across devices.

Tools Used: Python, Transformers, TorchVision, Seaborn, Next.js, Node.js, MongoDB

SensAI – Your Personal AI Career Coach

Nov 2024

- Developed SensAI, an AI-powered career coach using Next.js, Tailwind CSS, and Gemini AI for insights, resume building, and interview prep.
- Integrated Clerk authentication and managed structured user data using NeonDB with Prisma for secure, scalable user management and data access.
- Designed a responsive UI with Shadcn UI, including PDF resume export, onboarding flow, and performance dashboards.

Tools Used: Next.js, Tailwind CSS, Shadcn UI, Gemini AI, Prisma, NeonDB, Clerk

RTO Safety Compliance Tracking System for Tractors

Aug 2024 – Oct 2024

- Designed an AI-powered system to detect safety compliance on sugarcane tractors.
- Utilized YOLOv8 for tractor detection on manually curated dataset, CNN for compliance verification, and Tesseract OCR for number plate recognition.
- Engineered a real-time monitoring dashboard using Streamlit for real-time monitoring and RTO notifications on non-compliant vehicles.

Tools Used: YOLOv8 API, CNN, React.js, Tesseract OCR, OpenCV, Streamlit, Node.js

Experience

Web Development Intern *Codex*

Feb 2025 – March 2025

- **Dynamic Web Pages:** Created dynamically updating webpages with interactive cards for the company.
- Implemented animated components for improved user experience.

Software Development Intern *Vsharp magnet Pvt. Ltd, Mumbai*

June 2024 – Aug 2024

- Developed and maintained the company's product website using modern frontend practices, enabling users to browse products, request quotes, and download catalogues.
- Collaborated with design and product teams to enhance UI/UX for seamless user experiences.

Python Development Intern *Codex*

Dec 2024 – Jan 2025

- Developed and optimized Python-based automation scripts to streamline backend processes, reducing manual efforts by 40%.
- Built custom data parsers and processing pipelines for internal tool integration and data handling.
- Contributed to writing modular, reusable Python code for various product modules, adhering to clean code principles.

Technologies

Programming Languages C, C++, Python

ML Frameworks TensorFlow, PyTorch, Scikit-learn, OpenCV, TorchVision, Seaborn

Web Development ReactJS, NextJS, NodeJS, ExpressJS, Bootstrap, TailwindCSS, Shadcn, Clerk, HTML5

Databases MySQL, MongoDB, Prisma

Data Analytics Python, SQL, Power-BI, MS Excel

Tools Git, Figma, Canva
