OBJECTIVE

Curious and driven Computer Engineering student with a strong foundation in backend development, system design, and data structures. Passionate about building scalable systems and solving real-world banking tech challenges using modern architectures and agile practices. Thrive in environments that value clean code, continuous delivery, and cross-functional collaboration to drive impactful product evolution.

EDUCATION

Bharatiya Vidya Bhavans, Sardar Patel Institute of Technology

Nov 2022 - July 2026

B.Tech in Computer Engineering.

CGPA: 7.7/10.

K. J. Somaiya College of Science And Commerce, HSC

Sept 2020 - March 2022

Percentage: 85.67% in Science Stream.

St Lawrence High School Thane, SSC

March 2020

Percentage: 92.6%

2nd Rank in School.

SKILLS

Programming Languages	C, Java, Python, JavaScript
Frontend Technologies	HTML, CSS, React JS
Backend Technologies	Node JS, Express
Tools	Figma, SQL, Numpy, Pandas, VS Code, Docker, Git, Github
Databases	MongoDB, MySQL

PROJECTS

1. BookMyStay – Hotel Booking System

GitHub

- Developed a hotel booking web app using MERN stack with login authentication and payment integration via **Razorpay**.
- Designed a responsive UI with React; tested on **10+ screen sizes** for cross-device usability.
- Enabled real-time room booking and status updates through REST APIs, **reducing booking delays by over 30%**.

2. TradeGuard – Rapid Compliance Checker

GitHub

- Developed a real-time rule engine to **flag non-compliant export shipments**, validating against destination restrictions, prohibited items, missing fields, and value/weight limits—**reducing manual compliance errors by 70%**.
- Designed a complete **role-based system** (Shipping Staff and Compliance Admin) with dashboards, CSV upload, and PDF/HTML report generation; enabled end-to-end shipment management and regulatory audit trails.
- Built an intuitive **Admin Rule Management Panel** for defining and testing compliance logic, managing overrides with justifications, and tracking analytics.

3. J.A.R.V.I.S – Virtual Assistant

GitHub

- Built a Python-based assistant to automate **5+ OS tasks** such as system shutdown, screen lock, and app launching.
- Contributed to dataset research and preprocessing for command recognition logic, **improving command accuracy by ~20%**.
- Collaborated in a **3-member team** as the ML Engineer, ensuring modular code design and feature testing.

EXTRA-CURRICULAR ACTIVITIES

- SoftLink Hackathon @ IIT Bombay. Finalist** at a national-level hackathon.
- Served as **Head of Operations** at the **E-Cell** in the second year, overseeing logistics and managing multiple campus events.
- Engaged with the **Social Entrepreneurship club, Enactus**, during the first year to build management fundamentals and communication skills.

CERTIFICATIONS

- Analyzing and Visualizing Data with Microsoft Power BI – Skill Nation
- Pandas – Kaggle
- SQL (Intermediate) – HackerRank
