Education

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Engineering

Nov 2022 – Present

CGPA: 8.85/10

Technical Skills

Programming Languages: Python, C, Java, PL/SQL

Web Development: React, Django, Flask, Next.js, Streamlit, HTML, CSS, JavaScript

Database: MySQL, PostgreSQL, SQLite

Data Science & ML: Librosa, NumPy, Pandas, Scikit-Learn, TensorFlow, MoviePy, MediaPipe

Developer Tools: Git, Jupyter, Google Colab, Figma, Canva

Experience

Splore (AI for CIO's & Asset Managers)

March 2025 – Present

AI Solution Intern

Mumbai, India

- Reduced manual evaluation efforts by 40% by integrating automated prompt diagnostics using Langfuse, improving LLM output quality and streamlining model refinement workflows.
- Automated financial report generation for an international venture capital firm, achieving full process automation by designing and implementing custom OpenWebUI workflows for data extraction.

Six Ladders (@SPTBI)

June 2024 – August 2024

Software Development Intern

Mumbai, India

- Improved multimedia learning efficiency and quality by cutting lecture videos 60% shorter and preserving visual integrity, by developing an AI-driven module that removed filler content, stitched key segments, auto-tagged topics, and applied content-aware seam carving.
- Enhanced session persistence and user convenience, by engineering Google Drive integration with OAuth2 and Streamlit, which eliminated repeated logins and enabled secure document upload, browsing, and retrieval.

Google Developer Student Club

August 2023 – June 2024

Technical Team

Mumbai, India

- Spearheaded Google Cloud Study Jam workshop, guiding 50+ peers through Colab notebook setups, API key creation, and service deployments—achieved 95% participant satisfaction by developing tutorials and delivering technical mentorship.
- Designed and launched a multi-level coding challenge website, engaging 100+ students in progressive tasks—drove a 40% hike in participation by architecting interactive levels and coordinating logistics.

Projects

The Memory Box | *Next.js, NeonDB, Drizzle ORM, Cloudinary, Flask, MoviePy*

- Integrated face grouping system using Machine Learning for personalized grouping and video generation, with a sleek UI.
- Enabled seamless album creation, collaboration with shared permissions, and automated email notifications using Resend.
- Implemented capsule functionality for time-locked, password-protected memory storage including a gifting system.

Eco-Travel Platform | *Flask, Clerk, Supabase, Tailwind*

- Built a platform promoting eco-travel, integrating advanced AI models for chatbot support and itinerary recommendations.
- Used web scraping to provide real-time eco-tourism data and a carbon footprint calculator, influencing greener travel decisions.
- Proposed a gamified reward system to encourage eco-friendly travel and a donation to support NGO's in sustainable initiatives.

Yoga Pose Classification | *Custom CSS in Streamlit, Django, Mediapipe*

- Designed system using MediaPipe to detect body key points using angle heuristics, achieving excellent pose classification accuracy.
- Integrated real-time feedback and frame-freezing for pose correction, enhancing user alignment during sessions.

Certifications

Build your own GPT from scratch | *Vizuara AI Labs*

June 2025

Generative AI Fundamentals | *Vizuara AI Labs*

June 2025

Scope Course | *JPMorgan Chase & Co.*

August 2024 – June 2025

Supervised Machine Learning: Regression and Classification | *Stanford University*

April 2024

Achievements

Finalists @UBS (Union Bank of Switzerland) Hackathon | *Competitive Programming Achievement*

April 2025

Finalists at BitAndBuild'24 International Hackathon | *FRCRCE - Top 50*

October 2024
