Education

Sardar Patel Institute of Technology	2022 – 2026
<i>Bachelor of Technology in Computer Engineering</i>	<i>CGPA: 8.37</i>
Sardar Vallabhbhai Patel Vidyalaya and Jr. College	2020 – 2022
<i>Higher Secondary Certificate (HSC)</i>	<i>Percentage: 82.67%</i>
St. Vincent De-Paul High School	2010 – 2020
<i>Secondary School Certificate (SSC)</i>	<i>Percentage: 91.80%</i>

Experience

SCOPE @ JPMC	June 2024 - December 2024
* Gained industrial exposure through sessions on Agile methodology, software testing, and best practices in software development.	
Aim4U Company	October 2023 – December 2023
<i>Web Developer Intern</i>	<i>Andheri, Mumbai</i>
- Built and integrated core UI components for gyan.aim4u.co.in using Chakra UI. - Collaborated with the Django backend team to ensure seamless API integration and efficient data handling. - Enhanced platform responsiveness, accessibility, and overall user experience across devices.	

Notable Projects

Healthwise: Remote Patient Monitoring <i>Python, React, Wear OS, Machine Learning, AI, IoT</i>	March 2025
- Developed an AI-driven health dashboard connected to smart wearables for real-time vitals tracking, anomaly detection, and automated SOS alerts. - Implemented ML models for heart risk analysis enabling early heart failure prediction; integrated QR-based Smart Health ID for instant access to medical records. - Built a virtual health assistant using Google T5, offering personalized meal plans, medication reminders, and mental wellness support.	
Revolutionizing Learning with AI <i>Python, LangChain, Gemini API, Django, React, ML, NLP</i>	February 2025
- Built a full-stack AI learning platform using Django + React, with adaptive testing, real-time attention tracking, and progress analytics. - Developed a chatbot tutor using Gemini API and LangChain for contextual academic Q & A from lecture transcripts. - Automated note summarization with Hugging Face Transformers and Facebook BERT; implemented real-time drowsiness detection using eye aspect ratio with OpenCV, Dlib, and Django-based state tracking.	
Dhara: AI-Driven Mine Safety <i>Python, PyTorch, Machine Learning, React, MongoDB, IoT, OCR</i>	December 2024
- Designed Python-based ML pipelines for floor segmentation, tool age prediction, and SMP compliance, leveraging real-time sensor data to optimize safety protocols. - Trained anomaly detection and hazard classification models using PyTorch and scikit-learn, improving predictive insights and alert accuracy. - Built an OCR pipeline with Tesseract and OpenCV to digitize handwritten safety logs; integrated with a Python backend for structured data processing. - Developed an IoT-driven alerting system for monitoring temperature and gas levels, triggering real-time SOS alerts, auto-generating shift reports, and visualizing outputs through a React dashboard.	

Technical Skills

Languages: Java, Python, SQL

Developer Tools: Windows, Linux, VS Code, Jupyter, Git, GitHub

Technologies/Frameworks: Django, Bootstrap, HTML, CSS, MySQL, Basics of Docker

Achievements

- National Winner at Smart India Hackathon 2024.
- Secured 2nd runner up in HERE Technology 2025.
- Secured 2nd place in BITS Pilani, Goa Hackathon.

Positions of Responsibility

Operation Head, Sports Committee – SPIT	2023–2024
---	-----------
