Education

Sardar Patel Insitute of Technology, Mumbai

Nov 2022 – Present

B.Tech Computer Engineering

CGPA: 9.51/10

SP Jain Institute of Management and Research

2024 – Present

Minors in Management

Experience

Software Developer Intern

July 2024 - Nov 2024

Six Ladders

- Developed a financial investment app with a clean UI and smooth onboarding experience, contributing to a production-ready React Native application.
- Built modular, reusable components and followed scalable architecture practices, reducing code redundancy by 40%.
- Integrated multiple APIs to create real-time, interactive dashboards, doubling dashboard load speed and improving data responsiveness.

Web Developer Intern

[🔗 Link](#)

Black Fox Millenium Private Limited

- Translated many Figma-based mockups into responsive React pages with mobile-first design, achieving delivery on time.
- Collaborated with clients and design teams to gather feedback and iterate quickly, reducing UI revision cycles by 40% and improving Lighthouse scores by 20+ points through performance optimization.

Projects

UPAY (JPMC - CFG) | React, Express.js, PostgreSQL, TypeScript, Google Gemini AI, OpenCV

[GitHub](#)

- Built a platform to streamline footpath school operations, including student, volunteer, and center management.
- Enabled role-based workflows with features like scheduling, multilingual AI chatbot, and real-time academic tracking.
- Integrated face recognition and geofencing-based attendance, BMI/marks monitoring, and content management tools.

Witty AI | Flask, React, Express.js, Python, OpenAI, Notion API

[GitHub](#) | [Demo](#)

- Engineered an AI-powered document and task management system with multi-agent coordination to streamline startup operations.
- Implemented automation for scheduling, document handling, and meeting summarization using OpenAI and various third-party APIs.
- Built a scalable and secure architecture ensuring high performance while integrating multiple external services.

Legal AI | React, Flask, Express, PostgreSQL, Tailwind CSS, shadcn, BERT, USE, and OCR

[Demo](#)

- Built a comprehensive case management dashboard for law firms, enabling search, filtering, and similarity-based case retrieval using vector embeddings in PostgreSQL.
- Developed document automation tools with legal templates, version control, and rich text editing, allowing lawyers to efficiently generate, edit, and manage legal documents.
- Integrated advanced document processing with automated summaries, category tagging, OCR for image-based text extraction, and e-signature functionality for seamless document management.

Skills

Languages: Python, Java, C, JavaScript

Web & App Development: HTML, CSS, JavaScript, React, Tailwind CSS, Node.js, Express.js, Next.js, React Native

Backend: MongoDB, MySQL, Firebase, Supabase, PostgreSQL

Tools: Git/GitHub, Postman, Canva

Achievements

1st Runner Up - Hackniche 3.0 Hackathon (ML domain): Created ShopMart, an AI-based e-commerce platform with visual search, natural language processing, product recommendation systems, and sales analytics.

1st Runner Up - Bit Build International Hackathon: Built a restaurant management system with machine learning, forecasting models, sentiment analysis, and inventory tracking.

Domain Winners - Aeravat 2.0 Hackathon (Health Tech domain): Developed MediSafe AI, a healthcare platform with prescription analysis, drug interaction detection and AI-driven report interpretation for safer treatments.
