EDUCATION

- Sardar Patel Institute of Technology (S.P.I.T.), Mumbai Nov 2022 – Present
Bachelor of Technology in Computer Engineering
CGPA: 7.93/10
Courses : DSA , ML , AI , NLP , Data Analytics, Software Engineering
- MHTCET 2022 - 97.86%ile
- S.V. Junior College , Kalyan West Aug 2022
Higher Secondary Certificate (HSC)
- All Saints High School, Kalyan May 2020
Central Board of Secondary Education (CBSE)

PROJECTS

- CrimeEye AI: Real Time Crime Detection using CCTV (Computer Vision and Deep Learning)**

Currently Ongoing

Built an **AI-powered surveillance system** that **detects weapons and violent activities** in real-time video streams. Utilized **YOLOv8** for weapon detection and employed video classification models like **MoViNet** and **I3D** for identifying violent behavior across sequences of frames. Integrated **OpenCV** for live video processing and implemented a **threat alert system that sends location-based notifications** to nearby authorities. The project emphasizes real-time performance, low false positives, and practical deployment on edge devices.

- Land Cover Classification Using Sentinel-2 Satellite Imagery (Machine Learning)**
February 2025

Built a supervised ML pipeline to classify **Sentinel-2** satellite images into land cover types (vegetation, water, snow, etc.). Preprocessed .jp2 bands using Rasterio, engineered NDVI/NDWI features, and applied scaling and dimensionality reduction. Trained a tuned **Random Forest model with 99% accuracy**, evaluated via **cross-validation**, and deployed it to generate land cover maps **and visualize 10-year terrain changes**.

- MotoDesk: Automobile Sales Management System(Web Development)**
April 2024

MotoDesk is a platform that simplifies **automotive dealership** operations, covering sales management, inventory tracking, and CRM. Built with React.js and designed in Figma, it's backed by **Node.js, Express.js, and MongoDB**. As a backend enthusiast, I **developed RESTful APIs**, implemented **secure authentication**, integrated external services, and **handled deployment**. Collaborating closely with the frontend team, I ensured smooth API performance, scalability, and a seamless user experience—sharpening my backend and deployment skills.

SKILLS

- Proficient in Modern programming languages:** C/C++, Python, Java, JavaScript, SQL/MySQL
- Data Analytics:** Pandas ,Matplotlib, Numpy , Tableau
- Web Development :** Node.js,Express.js, MongoDB , REST APIs, React
- Machine Learning:** scikit-learn, NumPy, Pandas, Matplotlib, CNN models, YOLO
- Self Learner and Technology Adaptive**

ACADEMICS ACHIEVEMENTS AND CERTIFICATIONS

- Second in Junior College**
- Elite+ Silver in Business Analytics And Text Mining Using Python (NPTEL)**
- British Airways Data Science Virtual Experience Program – (Forage)**
- Gold in Learning English (NPTEL) (Top 5%)**
- Introduction to GenAI**
