Education

Sardar Patel Institute of Technology

Bachelors of Technology in Computer Engineering

2022 - 2026

Mumbai, Maharashtra

Technical Skills

Languages: Python, Java , C

Databases: MySQL , MongoDB

Developer Tools: VS Code , IntelliJ , Anaconda , Git , Postman

Technologies/Frameworks Numpy , Pandas , Restful Web Services

Experience

Maxsure Infocom Solutions LLP 

May 2025 - July 2025

Python Developer Intern

Ahmedabad, Gujarat

- Collaborated with the development team to design and build the company's official website, focusing on responsiveness, performance, and user-friendly UI using modern web technologies.
- Deployed a Telegram chatbot leveraging Python and the Telegram Bot API, handling client interactions and achieving a satisfaction based on user feedback surveys.

TalentsConnects 

Jan 2025 – April 2025

Software Developer Intern

Bangalore, Karnataka

- Developed and tested 20+ RESTful API endpoints for job matching in a microservices-based backend system, improving recommendation accuracy to 85%+.
- Contributed to the backend development of the RawRecruit website by writing and testing **30+ API endpoints**, resolving **bugs**. Implemented web scraping using BeautifulSoup to extract candidate experience data from **50+ resumes**, improving matching precision significantly.

SPTBI (Insightress)  

Feb 2025 – May 2025

Software Developer Intern

Mumbai, Maharashtra

- Built a backend using **FastAPI**, developing **RESTful APIs** to fetch and process JSON-based data for powering dynamic frontend dashboards.
- Conducted in-depth analysis of company datasets to extract insights, improving job matching accuracy by identifying hiring trends and skill gaps across startup ecosystems.
- Developed a real-time data analytics dashboard projected to be used by **10+ startup incubators**, tracking **year-over-year growth**, **funding history**, and **incubation metrics** for strategic planning.

GetFly technologies

Nov 2023 – Dec 2023

Frontend Intern

Mumbai, Maharashtra

- Designed responsive and visually appealing web interfaces using HTML, Tailwind CSS, ensuring a seamless user experience across devices.
- Worked closely with the development team to integrate frontend components with backend APIs, debugged UI issues, and enhanced the overall functionality of the company's platform.

Projects

GreenCheck | *Python*

February 2025

- Developed a deep learning plant disease detection system using TensorFlow, Keras, achieving high classification accuracy.
- Implemented image preprocessing techniques (rotation, flipping) to improve model generalization.
- Trained and optimized a CNN on the PlantVillage dataset, fine-tuning hyperparameters for enhanced performance.

WeatherPy | *Python*

June 2024

- Developed a Python-based weather forecasting application that retrieves live data from OpenWeatherMap API.
- Implemented a simple CLI interface for users to search cities and view temperature, humidity, and weather conditions.
- Leveraged Python's Requests library and JSON parsing for seamless API integration and efficient data handling.

Achievements

Codechef: Secured a rank of 250 in the Starters 161 contest and achieved a peak rating of 1400.

Leetcode: Achieved a max rating of 1700. Also solved 500+ problems at leetcode platform

GeeksforGeeks: Recognized as a 4-star coder with more than 300+ problems solved on the platform.

Hackathon: Participated in Asia's one of the largest hackathon conducted by the nvidia
