Education

Sardar Patel Institute of Technology

Bachelors of Technology in Computer Engineering

2022 - 2026

Mumbai, Maharashtra

Technical Skills

Languages: Python , C

Developer Tools: VS Code , Tableau

Technologies/Frameworks: Numpy , Pandas , matplotlib , Streamlit , Seaborn

Experience

Talentconnect

April 2025 - Present

Python Developer Intern

Bangalore, Karnataka

- Implemented a **Python-based recommendation system** for **UtsaviMart** using **pandas**, **NumPy**, and **cosine similarity** to suggest similar products based on users' **browsing behavior**, **order history**, **price**, and **category**. Developed secure API endpoints for user authentication, product listings, cart, and order handling. Built a comprehensive admin dashboard providing a **no-code solution** to manage products, payments, discounts, and complaints, and integrated an **analytics tool** to monitor key metrics like revenue, top-selling products, and sales trends — enabling quick access to financial insights.
- Contributing to **RawRecruit**, a job portal for students and professionals — used **Python** to parse resumes and match them with job descriptions using **pdfminer**, **scikit-learn**, and keyword extraction techniques. Also developed role-based dashboards to enhance the job search experience for freshers and experienced users.

Projects

FinSight – Financial News Summarizer | *Python, FastAPI, Gemini API, NewsAPI*

March 2025

- Engineered a real-time NLP pipeline that fetches and processes **100+ financial news articles daily**, summarizing key insights using **Gemini API** for traders and analysts.
- Filtered noisy headlines using keyword heuristics and named entity recognition, boosting information relevance by **35%** in testing.
- Designed REST endpoints with **FastAPI** and deployed the service to integrate with a dashboard or messaging bot for instant financial updates.

SpendSmart – Personal Expense Analyzer | *Python, pandas, Streamlit, Matplotlib*

February 2025

- Built a lightweight expense monitoring tool that parses PDF and CSV bank statements, auto-classifying **1000+ transactions** across categories like food, rent, travel, and utilities using rule-based logic.
- Enabled real-time budget tracking and month-on-month trend comparison through **Streamlit** visualizations, improving financial clarity for users.
- Used data wrangling and visualization techniques with **pandas** and **Matplotlib** to generate personalized spending summaries and downloadable reports.

BankSQL – Financial Metrics Dashboard | *SQL (PostgreSQL), Tableau*

January 2025

- Designed and optimized complex SQL queries to compute key banking KPIs including **monthly revenue**, **customer churn**, **retention rate**, and **average transaction size**.
- Utilized CTEs, window functions, and date-based aggregations to support robust reporting logic for executive dashboards.
- Integrated the SQL outputs into Tableau to build interactive charts that allow slicing metrics by user type, product, and region.

Extracurricular Activities

- Taught** over **100 students** at **Abhudaya Vidhyalaya**, conducting doubt-clearing sessions, and fostering a positive learning environment to improve student understanding and performance.

Achievements

- Secured **1st Rank** in both Secondary and Higher Secondary categories, demonstrating strong problem-solving and competitive programming skills.
- Secured **1st Rank** in Economics Course in IIIrd and IVth semester among **50 students**
- Achieved a rank **under 1000** out of **over 2 lakh students** in the MHT-CET examination
