Education

Sardar Patel Institute of Technology, Mumbai

2022 – Present

Computer Engineering

8.71/10

Experience

Flip-Classroom

September 2024 – November 2024

Software Developer

SPJIMR, Mumbai, Maharashtra

- Developed a "Flip Classroom" platform enabling teachers to create courses with session-specific pre-class, in-class, and post-class activities.
- Implemented an AI-powered chatbot for query resolution, automatic MCQ generation, and assessment based on teacher-provided documents.
- Designed a RAG system with student performance analytics, identifying knowledge gaps for personalized improvement.
- Integrated automated evaluation and reporting mechanisms to enhance learning efficiency and provide actionable insights for educators.

Projects

InventoSync 🌀 | *React, Node.js, Express, MongoDB, Flask, Google Suite, Telegram API*

March 2025

- Developed an AI-powered inventory management system to automate tracking, forecasting, and optimization of product inventory.
- Implemented a dynamic dashboard with real-time alerts for stock levels, expiry tracking, and profit/loss insights.
- Integrated a marketplace to resell overstock products, reducing waste and optimizing business resources.
- Built a chatbot for B2B negotiations and Telegram API automation to manage inventory via simple commands.
- Used the Prophet forecasting model trained on three years of sales data for demand prediction and seasonal trend analysis.
- Designed an automated reporting system delivering sales insights and stock recommendations via WhatsApp, Telegram, and Google Docs.

LearnWiseAI 🌀 | *React, Tailwind, Node, MongoDB, Flask, Ollama, LangChain, Git*

September 2024

- Implemented a RAG-based chatbot with Ollama and LangChain on a Flask backend, enabling students to generate MCQs, summaries, notes, roadmaps, and reports based on user prompts.
- Integrated text-to-speech and speech-to-text functionalities for visually impaired students, along with language translation for chatbot responses, promoting inclusivity and accessibility.
- Created a real-time discussion forum using WebSockets, allowing seamless student discussions and collaborative learning experiences.
- Enhanced user experience with a responsive front-end interface, while optimizing the back-end for secure, efficient data management and content access.

Data Symphony 🌀 | *Next, Tailwind, Node, Clerk, Uploadthing, Mux, Prisma, SQL, Git*

August 2024

- Developed a dynamic e-learning platform using Next.js and Supabase with PostgreSQL, enabling users to create, manage, and enroll in courses featuring videos, PDFs, and PPTs.
- Implemented real-time progress tracking and updates for enrolled courses, enhancing user engagement and course management efficiency.
- Designed a dual-role system where users act as both teachers and students, fostering collaborative learning and content sharing.

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript, SQL, HTML/CSS

Developer Tools: Git, GitHub, VS Code, IntelliJ, Postman, Docker, Hugging Face, Figma

Technologies/Frameworks: React, Next.js, Flask, Node.js, Tailwind CSS, Prisma, MongoDB, PostgreSQL, Firebase

Leadership / Extracurricular

GDSC

Coordinator

- Streamlined organization of work flow and a smooth execution throughout the course.
- Encouraged my team all along the course and helped them wherever help was required.
- Effectively ensured that all students have completed the assigned work and achieved completion before deadline.
