EXPERIENCE

Frontend Developer – Web Dashboard Project (Startup Incubation Platform)

SPTBI | Feb 2025 – May 2025

- Developed a responsive analytics dashboard using ReactJS to visualize KPIs and metrics from multiple data sources, improving decision-making for stakeholders.
 - Integrated backend APIs to dynamically fetch and display structured data in charts and tables.
 - Collaborated with a cross-functional team to ensure accuracy and consistency in data representation.
-

PROJECTS

PCOS Data Analysis

- Explored and analyzed PCOS-related health data to identify trends and potential risk factors.
- Cleaned and prepared the dataset using Pandas for accurate analysis.
- Created an interactive Tableau dashboard visualizing key variables like BMI, insulin levels, etc.

Zomato Data Analysis

- Analyzed Zomato restaurant data to explore trends in cuisine popularity, ratings, pricing, and location-based performance.
- Used Python to clean, process, and visualize data.
- Identified key factors influencing high ratings and customer engagement, such as average cost, delivery options, and restaurant type.

Beatsss: Vibe and Move

- Built a full-stack MERN music web application with JWT authentication, CRUD operations, and real-time playback.
 - Integrated Cloudinary to store, optimize, and deliver audio tracks and thumbnails via APIs.
 - Developed and tested backend APIs using Postman, ensuring scalability and responsiveness.
-

EDUCATION

B.Tech in Computer Engineering | Dec 2022 – July 2026

Sardar Patel Institute of Technology. Current CGPA (6th semester): 7.71

SKILLS

- **Languages / Database:** Python, SQL, MongoDB, Javascript
 - **Frameworks & Libraries:** ReactJS, NodeJS, Express
 - **Tools:** Postman, Figma, Tableau
-

Volunteer Work

Teaching Volunteer – Abhyudaya (Summer 2024)

- Taught math to 45 underserved 7th-grade students using animated decks and custom worksheets.
- Assisted in organizing extracurricular activities for 50+ students during the summer camp.
