Objective

Results-driven and detail-oriented professional with a passion for data analysis and problem solving. Seeking a position where I can leverage my analytical skills and mathematical skills and experience in Python programming to contribute to the success of a dynamic team.

Education

- Pursuing BTECH in Computer Engineering (6th Semester), at SPIT, Mumbai (2026): CGPA (Current): 8.85
- MHTCET: 99.64 Percentile (Rank 477)
- Senior Secondary: 96.6%
- Secondary Education: 94%

Projects

- **Movie Recommendation System:** Suggests 8-9 movies based on genre, director, cast using cosine similarity and KNN.
Tools: Python, Jupyter, JSON, React
- **Backtesting for Index Trading:** Optimized parameters for profit and drawdown using Python.
Tools: Python, MySQL, React
- **Cricket Score Prediction System:** Predicted final inning score using live match metrics.
Tools: Python, MySQL, Streamlit

Skills

Languages: Python, R, Matlab, C++

Database: MySQL, MongoDB

Tools: AutoCAD

Key Courses Taken

- **Data Analysis and Decision Making-I (NPTEL):** ML and real-life statistics visualization
- **Mathematics for Economics (NPTEL):** Probability and calculus applications
- **Business Analytics using Python (NPTEL):** Text mining concepts and implementation

Experience

- **AI Engineer Intern, LearningMate (1.5 months)**
Fine-tuned a dataset of 7000+ entries to generate structured academic questions based on given instructions, difficulty level, grade, and topic. Developed an AI-based solution for dynamic question generation in educational content pipelines.

Achievements and Awards

- Top 5% in NPTEL: Data Analysis and Decision Making-I
- Silver Elite in NPTEL: Mathematics for Economics
- Silver Elite in NPTEL: Business Analytics using Python
