Professional Summary

Innovative Computer Engineering student with expertise in AI/ML development, full-stack web development, and deep learning. Proven track record of building production-ready applications and successful deployment of real-time systems. Passionate about leveraging cutting-edge technologies to solve complex problems and create impactful solutions.

Education

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Engineering (CGPA: 6.7/10)

Mumbai, India

Dec 2022 – Aug 2026

Kendriya Vidyalaya Vayusena Nagar

CBSE XII - 79.8%

Nagpur, India

Aug 2020 – May 2022

Bhavan's B.P Vidya Mandir

CBSE X - 91.8%

Nagpur, India

Aug 2019 – May 2020

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, LaTeX, SQL

Web Technologies: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Clerk

Databases & Cloud: MongoDB, MySQL, Prisma, AWS, GCP, Docker, Git, GitHub, Inngest

Specialized Tools: Framer Motion, Stripe API, Postman

Experience

Web Development Intern

CodexIntern

November 2024

Mumbai, India

Engineered dynamic, interactive web applications, enhancing user engagement through seamless functionality, Developed reusable component libraries and implemented best practices for code maintainability and scalability

Projects

AImpact - AI-Powered Career Coach Platform

AI & Full-Stack Development

June 2025

Next.js, Gemini, Node.js, MongoDB, Inngest, Clerk

AImpact

Engineered comprehensive AI-driven career coaching platform, Developed ATS-optimized resume builder with intelligent content suggestions, Implemented AI-powered cover letter generator to create personalized, job-requirement-aligned cover letters, Built interactive mock interview system with role-specific question generation and real-time feedback mechanisms for interview preparation, Integrated Gemini API for intelligent career guidance and personalized industry insights.

Robust Deepfake Detection Platform

DL & Full-Stack Development

March 2025

Python, Next.js, TensorFlow, Tailwind CSS

Github Repo

Architected a comprehensive deepfake detection system using hybrid deep learning models combining XceptionNet, Attention Fusion, and DCT Convolutional features.

TravelX - AI-Powered Travel Platform

Full-Stack Development & AI Integration

August 2023

Next.js, OpenAI, MongoDB, Stripe

Github Repo

Developed comprehensive travel booking platform with AI-powered itinerary generation, hotel/flight booking, and secure payment processing, Integrated APIs for personalized itinerary creation.
