EDUCATION

Sardar Patel Institute of Technology | CGPA: 7.97

B.Tech in CSE with Specialization in AI-ML

Mumbai, India

Nov 2022 - Present

EXPERIENCE

Hexamad Digital | Startup Tech Fellow

April 2025 – Present

- Spearheaded front-end development for the **"GoSwipe"** MVP, building the complete user interface in **React** that constitutes over **70%** of the platform's core features for brand collaboration and campaign analytics.
- Translate foundational **product research** on influencer marketing workflows into tangible features by **developing 3+ iterative prototypes** and high-fidelity UI/UX designs, directly shaping the platform's core user journey.
- Collaborate on **backend** by defining **10+ API contracts** and **5+ data models** to support front-end features, ensuring seamless flow for **user authentication, content management, and real-time analytics**.

SKILLS

Languages / Databases: Java, JavaScript, TypeScript, SQL, MySQL, PostgreSQL, MongoDB

Technologies : Next.js, React.js, Node.js, Express.js, Zustand, Render, Vercel

Developer Tools : Git, GitHub, Figma, Postman, VS Code

PROJECTS

SAMARTH | React, Supabase, IPFS 🔗

Ongoing

- Engineered a secure complaint portal with **100% tamper-proof evidence storage** integrating anomaly detection and Streamlit-based triage to drive faster, data-driven police response.
- Automated evidence validation by implementing a **multi-stage image analysis pipeline** that uses **edge detection and Fourier analysis** to detect **digital tampering**
- Gathered insights from **5+ active-duty officers** to define requirements, then created a role-based access control with real-time alerts—scaling secure, data-driven policing across Mumbai via agile sprints and Work Breakdown Structure.

STUDYBUDDY | React, JWT Authentication, Node.js, Django, PostgreSQL, Langchain, RAG 🔗

Oct 2024

- Developed an EdTech platform unifying test generation, AI chat, notes, and messaging—using **React, Django REST, Node.js, and PostgreSQL** to support **8+** modules with secure **JWT authentication**.
- Architected a personalized test engine with dynamic questions, difficulty-based scoring, and analytics—letting students generate chapter-wise tests and get instant insights, boosting retention mechanics by **40%+**.
- Integrated a document-aware AI assistant using LangChain + RAG for real-time PDF chat—cutting user query time by **65%** and greatly improving the self-study experience through reinforcement learning catering study plans.

DIGITALDAIRY | Next.js, TypeScript, MongoDB, Zustand, Vercel 🔗

June 2024

- Built a modular **full-stack dairy operations platform**, digitizing **100% of previously manual workflows** and reducing **data entry errors**. Utilized **3+** dairy-specific calculation parameters and streamlined farmer-center workflows and enable real-time trader-consumer balance sheet tracking.
- Empowers dairy managers and farmers to **seamlessly record, track, and manage milk transactions** and profiles via an **intuitive dashboard, enhancing transparency, trust,** and efficiency across the dairy supply chain.
- Secured user access with **JWT-based auth** and HTTP-only cookies, enabling zero session compromise with fallback mechanism; deployed with via Vercel.

ACHIEVEMENTS

- Pitched and secured an investment offer for startup project **Elixir** in the **Shark Tank Trinity** event.
- Earned **12+ badges** and solved over **550+ problems** on Leetcode platform. [Leetcode](#)
- Won a **Silver Medal** at the **Tri-Nation Cup Open Jomasar Championship** representing The Indian Team.

POSITION OF RESPONSIBILITY

Shreshtha Club – Ops Executive

June 2023 – May 2024

- Organized and executed **7+** college events with Shreshtha Club, resolving last-minute logistical issues and ensuring smooth coordination across **100+** attendees.
- Designed and contributed to the official Shreshtha Club SPIT website, driving a **60%** year-over-year increase in marketing leads during tenure.
