LeetCode

Education

Sardar Patel Institute of Technology

B.Tech in Computer Science and Engineering; CGPA: 8.63/10

Nov 2022 – Present

Mumbai, India

SP Jain Institute of Management & Research

Minors in Management

Feb 2024 – Present

Mumbai, India

Technical Skills

Languages: C++, JavaScript

Frameworks/Libraries: React.js, React Native, Express.js, Next.js, Socket.io

Databases/Tools: MongoDB, MySQL, Supabase, Git, Postman, VS Code

Familiar with: Java, Python, Flask, Machine Learning

Relevant Coursework: Data Structures, Operating Systems, Computer Networks, DBMS, OOP

Projects

Saheli: Women's Empowerment Suite | *React Native, Express.js, MongoDB, Socket.IO*

March 2025

- Built a secure, multilingual cross-platform app suite—**Shakti** (safety), **Shree** (finance), and **Sakhi** (networking)—to empower rural women through mobile-first access, offline capabilities, and regional language support.
- Shakti:** Architected safety infrastructure with SOS alerts, motion-based snatch detection, fake call simulation, background audio capture, and real-time location sharing via per-user **Socket.IO** rooms.
- Shree:** Designed an offline simulator to teach digital finance using mock UPI, ATM, and NetBanking flows, with expense tracking, analysis and insights.
- Sakhi:** Developed a networking platform with resume uploads, community forums, and personalized content matching.

Rapid Compliance Checker | *React, React Native, Flask, Gemini Vision, FAISS, Twilio*

Feb 2025 – Mar 2025

- Crafted an image-driven item compliance validator using **Gemini Vision** and **FAISS**-powered RAG to semantically match detected items against vectorized restrictions.
- Scraped country-specific trade regulations, import documentation, and prohibited item lists from UPS and FedEx portals storing structured data in a vector database.
- Delivered interactive chatbot, compliance rules explorer, and bulk CSV checker with PDF export to email and WhatsApp via **Twilio** and **Composio**, with multilingual site support.
- Developed a role-based admin dashboard to create and manage dynamic compliance rules and prohibited items.

Voice-Driven AI Automation Platform | *React, React Native, Flask, Composio*

Jan 2025 – Feb 2025

- Designed a voice-controlled automation system for tasks like emailing, scheduling, and content generation, using **Gemini**, **LangChain**, **Composio** and **HuggingFace**.
- Utilized **Whisper** for multilingual speech-to-text, with Gemini for translation and intent extraction in diverse voice formats.
- Dynamically constructed LangChain agents based on task type, with Gemini-driven action mapping and user confirmation.
- Ran Whisper on Kaggle and exposed via **ngrok** for API access (2–5s transcription latency during development).

Real-Time Chess Platform | *React, Socket.IO, Express.js, MongoDB*

June 2024 – July 2024

- Created a full-stack multiplayer chess platform with authentication, real-time gameplay, move validation, and in-game chat.
- Implemented custom logic for legal chess moves, turn handling, and game-over conditions, ensuring smooth, rule-compliant play—validated by 20+ student users through internal testing.
- Engineered robust backend with **Express.js**, handling user sessions, disconnections, and automatic game state recovery.
- Used **MongoDB** to persist user profiles and game history, enabling logged-in players to track past matches and performance.

Achievements

- 1st Place** – Airavat, Level-Up, CodeCrafters, Hackanova (AI/ML domain)
- 1st Runner-Up** – Logithon (IIT Bombay) **2nd Runner-Up** – Technitude, Odoo Hackathon
- Finalist (Top 5 in domain)** – Smart India Hackathon 2024

Leadership & Involvement

Marketing Head – IPL Auction Event

Jan 2024 – Apr 2024

Mumbai, India

- Led IPL Auction marketing through campus-wide campaigns, sponsor outreach, and coordination with tech and PR teams.
