Percentage: 93

Projects

Post2Product AI | *Instagram Graph API, Amazon Seller API*

- Developed an AI-driven platform that empowers small-scale businesses to seamlessly convert their Instagram media into Amazon-ready product listings.
- Automated the extraction and transformation of social media content into compliant, SEO-optimized, and well-formatted product listings, streamlining the onboarding process for new online sellers.
- Enhanced market reach and operational efficiency for small businesses, enabling data-driven decision making and improved product visibility in competitive online marketplaces.

EcoChoice | *Data Collection, NLP*

- Built a web application that recommends environmentally friendly products based on their descriptions and sustainability attributes.
- Collected real-world eco-friendly product data from various websites to ensure relevance and authenticity.
- Developed a context-aware recommendation system that identifies and suggests semantically similar sustainable products.

Smart Inventory and Sales Optimization | *EDA, Power BI*

- Analyzed sales and inventory data to uncover trends and improve demand planning.
- Segmented stores based on performance to optimize inventory distribution across regions.
- Created interactive dashboards to monitor sales, inventory turnover, and demand in real time.

Technical Skills

Programming Languages: Proficiency in Python, C++, C, SQL

Technologies: Power BI, Tableau, Django, Flask, Jupyter Notebook, Excel, NumPy, Pandas, Matplotlib

Computer Fundamentals: Operating System, Database Management System
