## Education

### Sardar Patel Institute of Technology

Bachelor of Technology in Computer Science & Engineering (AI/ML)

Expected June 2026

CGPA: 8.05

### Ramnivas Ruia College

XIIth Grade (HSC)

2021 – 2022

Grade: 87.67%

### C.S.S.High School

Xth Grade (SSC)

2019 – 2020

Grade: 98%

## Relevant Coursework

- Data Structures
- Machine Learning
- Artificial Intelligence
- Cyber Security & Digital Forensics
- Algorithm Analysis
- Database Management
- GenAI

## Projects

### SmartRecruit | Python, NLP, GNN, FastAPI, Streamlit, MongoDB, LLMs

Ongoing

- Engineered an AI-driven resume filtering system to shortlist candidates, overcoming the context-awareness limitations of current tools.
- Utilized LLMs for keyword extraction, SBERT/RoBERTa for NER, and Graph Convolutional Networks (GCN) for contextual embeddings.
- Implemented multi-channel scoring (semantic, graph, rule-based, cultural fit) with visualized results for comprehensive evaluation.
- Achieved a 98.85% ranking accuracy when validated against a dataset of over 900 resumes.

### MumbaiRoadCare | Python, FastAPI, Streamlit, MySQL, Twilio, LLMs

May 2025

- Developed a conversational WhatsApp bot that simplifies and accelerates pothole reporting for Mumbai citizens, improving on the existing BMC system.
- Integrated Google Gemini API for robust image and text validation to ensure high-quality complaint data, a feature lacking in the current bot.
- Built an interactive Streamlit dashboard for municipal staff to visualize, filter, and manage complaints by ward with real-time status updates and Automated WhatsApp notifications to users upon complaint resolution.

### ChainSight AI | N8N, Quadratic, PostgreSQL, Python, AI-Powered Spreadsheets

June 2025

- Automated supply chain analytics to optimize inventory and delivery, significantly reducing time costs and boosting operational efficiency.
- Ingested sales data via N8N into PostgreSQL (Supabase) with Gmail integration to centralize information.
- Leveraged Quadratic's AI spreadsheet for natural-language data exploration, enabling faster and more intuitive analysis of data.
- Generated automated KPI summaries (Line Fill Rate, Volume Fill Rate, OTIF) with Python for data-informed decision-making.

### ClassiLog | Python, FastAPI, Sentence Transformers, scikit-learn, LLMs

March 2025

- Developed a hybrid log classifier integrating Regex, Transformers, Logistic Regression, and LLMs for superior accuracy.
- Engineered the system to be highly efficient, reducing the operational costs and manual effort of log classification compared to existing methods.
- Achieved an exceptional 99% classification accuracy across a diverse range of complex log formats.

## Technical Skills

**Programming Languages:** Python, C, SQL

**ML/AI:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLP, Deep Learning, LLMs

**Technologies/Frameworks:** FastAPI, Flask, MongoDB, MySQL, Linux, Git, GitHub, Excel

**Tools & Platforms:** Quadratic, N8N, Datastax, Autospay, Figma, Canva

## Achievements & Certificates

- **Top 10 Finalist, HERE Hackathon 2025** (HERE Technologies, SPIT) – Contributed to a team that built a novel roundabout detection algorithm with 95% precision, enhancing map accuracy.
- **Generative AI Certificate** (Vizuara AI Labs, May 2025) – Completed a course on GenAI foundations, LLMs, prompt engineering, and real-world applications.
