EDUCATION

Sardar Patel Institute of Technology (SPIT)

B.Tech in Computer Science Engineering (AIML), CGPA: 8.25, Last SGPA: 8.85

Vivekanand Education Society

HSC: Science, Grade: 90.2%, MH-CET: 99.3%tile

Andheri, Mumbai

2022 – Present

Chembur, Mumbai

2020 – 2022

EXPERIENCE

Kothari Tech Pvt. Ltd.

June 2024 – Aug 2024

Software Developer Engineer, Internship (Proof-of-work)

CST, Mumbai

- Solely handled the entire frontend of Lofaz's seller panel [↗](#) and internal admin panel using React.js, Redux Toolkit, Material-UI, Django, Postgres, GitLab & Vercel, supporting 3000+ active users.
- Integrated 25+ data pipelines to streamline sync across customer, seller, and admin panels. Added OTP-based login via Firebase and implemented pagination with URL syncing, improving system reliability by 40%.
- Built a live analytics dashboard using Recharts and Thunk Middleware, with loading skeletons, custom hooks, and periodic API polling to display up-to-date product, customer and order stats.
- Built product catalog views using MUI tables with advanced filters, optimizing UI to handle monthly orders.
- Improved system performance by fixing 20+ critical bugs, adding lazy-loading, and optimizing async API calls — reducing load times by 55%. Coordinated agile sprints and task flows across teams using Slack and GitLab.

ACHIEVEMENTS/EXTRA CURRICULAR [↗](#)

UBS India Hackathon'25: 2nd runner-up in this Union Bank of Switzerland organized hackathon

CraftNCode'24: Led the team to 1st place in a development challenge held by IIIT Bhubaneswar

SYNOPSISUM'25: 1st position across all domains, hosted by CSI-VESIT & Rotary Club of Ghatkopar West

PanIIT PIWOT'25: Winners at this Jio Convention Centre hosted event among 15000+ teams nationwide

Rotaract Club of Airoli (RID-3142): Served as a General Body Member for year 2022-23

Achieved a 1800+ rating on LeetCode, ranking in the top 8% globally. Profile: [piyanshu_g](#)

Ranked AIR 1865 from 31175 contestants globally in the LeetCode Biweekly 151. Standing: [link](#)

Ranked AIR 1574 from 26298 contestants globally in LeetCode Weekly 453. Standing: [link](#)

PROJECTS

Gyaansarthi.ai (UBS India'25) | React, Flask, MongoDB, Node.js, ZegoCloud, Whisper, OpenCV [🔗](#) [🔗](#)

- EdConnect platform for volunteers, students, & schools with features like live video sessions, interactive whiteboards, role-based dashboards and a volunteer-student recommendation engine using cosine similarity and a Langchain-powered telegram bot based on availability and subject needs.
- Engineered an AI-driven automated notes-taking tool for recorded meetings using a dynamic programming subset-picking algorithm with OpenCV to extract representative keyframes for concise summaries.

AIPrepGem: AI-based Mock Interviewer | Next.js, Neon, Postgres, Vercel, Google AI Studio, Clerk, WAPI [🔗](#) [🔗](#)

- Delivered role-specific mock interviews via an AI-powered call agent using WAPI for real-time 1-on-1 calls and Groq for ultra-fast transcriptions, boosting prep clarity with graph tracing and sorting visualizations.
- Integrated Clerk auth, Neon Postgres, and Nodemailer-based permission flows to manage secure access to premium features, maintaining 99%+ uptime on Vercel.

Hybrid API Logs Classification System | Streamlit, FastAPI, BERT, Pandas, Logistic Regression, Llama [🔗](#) [🔗](#)

- Built a log classification API combining Regex, Sentence-BERT + Logistic Regression, and LLM-based few-shot prompts to handle both structured and ambiguous log patterns effectively.
- Implemented dynamic routing based on data availability, achieving 90%+ accuracy and scalability.

CARE – Critical AI Response Engine | React Native, FastAPI, PostGIS, PostgreSQL, Docker, RabbitMQ [🔗](#) [🔗](#)

- Engineering a real-time emergency response system with WebSocket-based bi-directional communication for live updates, synced client-server state via RabbitMQ, integrated map-based responder tracking and geospatial service discovery using PostGIS + PostgreSQL, and added transcript analysis via hugging face's sentence transformers for vector-based classification, summarization, and sentiment detection.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, SQL

Frameworks & Tools: React, Next.js, React Native, Django, Flask, Three.js, JWT, Firebase, NumPy, Pandas, SciKit-Learn, NLTK, RAG, Vector databases, Knowledge Graphs, Git, GitHub Actions, Docker, Render, Vercel

Databases: MySQL, PostgreSQL, MongoDB Coursework: OOP, OS, ML, DBMS, Distributed Systems, Networking
