

PARAM GOGIA

Mumbai, Maharashtra, India

+91 9356236842 paramgogia25@gmail.com in linkedin.com/in/paramgogia github.com/paramgogia

Education

Sardar Patel Institute of Technology

B.Tech in Computer Science and Engineering - AIML (CGPA 9.55)

2022 – 2026

Mumbai, Maharashtra

SP Jain Institute of Management and Research

Minors in Management

2024 – 2026

Mumbai, Maharashtra

Experience

Russell Investments

May 2025 – June 2025

Summer Intern

Mumbai

- Interned at a global asset management firm with over **\$320 Billion** AUM, building automation tools and scalable orchestration for enterprise data stitching across big data platforms under **Enterprise Data Management Team**.

Bidyut Innovation

January 2025 – Present

Software Developer Intern

Remote

- Developing an **AI-driven website** for interactive UI customization, integrating an **LMS** to enhance user engagement in robotics-ed for over **20,000** users and **30+** schools in more than **3 countries** following Agile methodology using **AWS**.

Web3 and Research

March 2024 – Present

Blockchain Technology, Deep Learning Intern

SPIT, Mumbai

- Optimized **Deep Learning models** trained on 900K images along with explainable AI methods for melanoma detection. Built an Academic Credits Validation platform with ABC ID using **Hyperledger Fabric** and **IPFS**.

Smowcode

June 2024 – August 2024

Software Developer Intern

Mumbai

- Developed a **version control system** for product management, gaining hands-on experience with industry-grade **project deployment** and software development best practices.

Projects

RECreate | ReactJs, Solidity, Dart, Firebase, IPFS

December 2024

- Built a **B2B and peer-to-peer (P2P)** platform using **Polygon zkEVM** Cardano testnet for trading Renewable Energy Credits based on **ERC-20** tokens. Producers mint RECs, verified with **zero-knowledge proofs** via the **Reclaim protocol**, enabling seamless trading and a machine learning model to **detect fraudulent** transactions.
- Developed two **on-chain AI agents** to perform transactions and provide insights. Integrated **IPFS** for secure contract storage and built a mobile app with Dart, Flutter, and Firebase. Deployed smart contracts on-chain using **Solidity** for real-time decentralized transactions, asset tokenization and risk mitigation.

MindSync | React, Solidity, Dart, Python

January 2025

- Developed an **AI assistant** to analyze behavior, predict stress levels, and optimize schedules using **LSTM**, Facial Recognition (**OpenCV**, **DeepFace**), and Sentiment Analysis (**NLP**, **LSTM**). Integrated **TF-IDF-based vector embeddings** with LLM for intelligent recommendations.
- Secured profile reports with **SHA-256 encryption** and implemented **on-chain AI assistants** interacting with a **Solidity smart contract** on **Polygon ZK-EVM**, enabling decentralized automation and access control.

Achievements (11x Hackathon Winner)

First Place HackAurora (Blockchain) - VJTI
Winner East-India Blockchain Summit - IIT KGP
Winner Socio-Blockchain Hack - IIT Bombay
First Runner Up - SPIT Hacks 2025
First Runner Up - TSEC Hacks 2025
Winner CodeShastra XI - DJ Sanghvi
Second Runner Up - HackSync AI 2025

Finalist ETHIndia 2024
Winner - Exponential Award 2025
First Runner Up - FireHacks Fall 2024
First Runner Up - CodeNest International
Second Runner Up - Cornucodia International
Winner - Devforge Hacks International
Pupil@Codeforces and 1700+@Leetcode

Technical Skills

Languages: Java, Python, C, .net

Frontend: ReactJs, HTML, CSS, JS

Backend: NodeJs, ExpressJs, Flask

ML DS tools: Pandas, Numpy, TensorFlow

Database: PostgreSQL, MongoDB, AWS RDS

Blockchain: Solidity

Leadership / Extracurricular

Training and Placement Office, SPIT — Core Team Coordinator

Jul 2023 – Present

Abhyudaya (NGO by SPJIMR), SPIT — Teaching Assistant

Jan 2024 – Jul 2024

Computer Society of India, SPIT — Event Head

Sep 2023 – Jul 2024
