Education

Sardar Patel Institute of Technology Bachelor of Technology in Computer Science and Engineering (AIML)	Nov 2022 - July 2026 CGPA: 8.69
Creative Public School and Jr. College Maharashtra State Board (HSC)	June 2020 - Aug 2022 89.67%

Projects

E-commerce Platform <i>Docker, Kubernetes (Minikube), MongoDB, MySQL, Redis</i> Github	May 2025
- Developed using Microservices Architecture, containerized 6 services using Docker and orchestrated using Minikube. - Configured NGINX Ingress as a reverse proxy to enable load balancing and path-based routing to internal services. - Enabled inter-service communication using RPC and RabbitMQ for asynchronous messaging. - Handled atomic transactions using MySQL and managed the remaining service data with MongoDB.	
EduSync <i>ReactJS, NodeJS, ExpressJS, MySQL, JWT, Cloudinary</i> Github	March 2025
- Created a hybrid platform that combines the core LMS features with AI based course suggestions based on the syllabus. - Isolated professor and student functionalities by incorporating role-based access control using JWT tokens. - Used MySQL for structured data and integrated Cloudinary for storage of user-uploaded files. - Designed a drag-and-drop manager and calendar system with Nodemailer notifications for deadlines and parent alerts.	
Miles Together <i>MERN Stack, Socket.IO, Leaflet.js</i> Github	December 2024
- Built a carpooling app that allows drivers to add passengers within a n km radius, displayed on a map using Leaflet.js. - Integrated socket.IO for instant confirmations and messaging between users. - Secure Stripe-based payments for fare splitting and in-app ride payments.	
DigiLease <i>Ehtereum, Solidity, Hardhat, Node.js, Ethers.js, MetaMask</i> Github	April 2025
- Decentralized platform built using Ethereum smart contracts for automated rental agreements and utility settlements. - Designed escrow-based logic to securely hold and release monthly rent and deposits, simulating real-time lease durations. - Enabled MetaMask-based wallet authentication and seamless fund transfers via Ethers.js and Hardhat test networks.	
RAG based ChatBot <i>LangChain, Pinecone, Hugging Face Transformers, Flask</i> Github	Jan 2025
- Implemented document chunking and embedding using Hugging Face models and indexed data in Pinecone vector DB. - Used LangChain to orchestrate retrieval and response generation with Groq-hosted LLaMA3 as the LLM backend. - Implemented a Flask backend to handle PDF ingestion, query handling, and vector search pipeline via API.	

Technologies

Languages: C++, C, JavaScript, SQL	Databases: MongoDB, MySQL
Tools: GitHub, Postman, Docker, Kubernetes	Frameworks: React, Next.js, Node, Express

Achievements

VNIT Nagpur - Winner in the multiround competition Dexter: Ideate-Debate-Pitch
Vidyabhoomi Hackathon - 2nd Runner-up among 150+ teams in an online hackathon.
Airavat 2.0 AI Hackathon - Domain winner in GenAI track.

Positions of Responsibility

Head of Events at Computer Society of India - S.P.I.T.	Aug 2024 – July 2025
Led a 40+ member team to organize 5 large-scale hackathons, including a national flagship with 2,100+ participants from 20+ colleges and multiple coding competitions, managing end-to-end planning, budgeting, logistics, and outreach.	
Head of Public Relations at Computer Society of India - S.P.I.T.	Sep 2023 - Aug 2024
Managed social media accounts, ideating and curating posts to boost engagement and conducted on-ground campaigns by visiting colleges across Mumbai.
