Summary

Aspiring Software Engineer with a strong foundation in **object-oriented programming (Java)**, **scalable system design**, and **data analytics**. Proven ability to **solve complex problems** in a **collaborative team environment**, demonstrated through hands-on experience building and deploying full-stack applications. Eager to contribute to a fast-paced **banking technology** environment by developing robust, **scalable** solutions for **high-transaction systems**.

Technical Skills

Programming Languages: Java, Python, SQL

Web Development: HTML, CSS

Frameworks/Libraries: Django, Django REST Framework

Databases: MySQL, PostgreSQL, TiDB

Developer Tools & Cloud: Git, GitHub, Netlify, Render, Cloudinary

Core Competencies & Coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Engineering, Distributed Computing, Database Management Systems (DBMS)

Projects

Gourmet Link | Django, React, PostgreSQL, Tailwind CSS, Nutritionix, Cloudinary

Apr 2025

- Engineered an **end-to-end scalable meal planning application**, designing the data structures and system models for users, meals, and ingredients.
- Developed **15+ RESTful APIs**, ensuring seamless frontend-backend communication and integration with Nutritionix API for accurate **real-time nutritional analysis**.
- Reduced meal planning time by 60%** by implementing **AI-driven** one-click plan generation.
- Optimized backend performance using **select-related** queries to resolve the **N+1** problem, enhancing API efficiency and contributing to Google Lighthouse scores of **80** for **Best Practices** and **85** for **Accessibility**.

InvestmentHub | Django, React, Phi Data, AlphaVantage, YFinance, PostgreSQL

Mar 2025

- Collaborated** in a 4-person team to co-lead backend development, taking a **strong sense of ownership** over features that provide investors with **critical risk management data and analytics**.
- Designed and built features for **real-time data visualization** and sentiment analysis from financial news sources to help users make **data-driven investment decisions**.
- Created an **algorithmic trading rule interpreter** and added a learning hub with financial articles, videos, and e-books to support financial literacy.

ShareKare | Django, HTML, CSS, SQLite, Leaflet Maps

Jan 2024 – Apr 2024

- Took **ownership** of the backend development and **API design** for a donor-NGO platform, managing the full lifecycle from API definition to implementation.
- Improved operational efficiency by 20%** by applying the **TSP algorithm** to optimize donation pickup routes.
- Drove volunteer engagement by designing a matching algorithm that **boosted volunteer matching efficiency by 40%**, improving platform collaboration and solving the core user problem of connecting relevant volunteers.

Certification

Understanding Socially Shared Metacognitive Regulation (SSMR)

Feb 2025

Centre for Educational Technology, IIT Bombay

- Collaborated with a team to identify and analyze critical user barriers in coding education for vernacular language students, leveraging strong **analytical skills** to drive a **user-centric approach**.
- Analyzed barriers like syntax comprehension and error message clarity, proposing a solution to translate these into native languages.
- Designed an **inclusive, user-focused system architecture** to improve accessibility and learning outcomes.

Education

Sardar Patel Institute Of Technology, Mumbai

B.Tech - Computer Science and Engineering - CGPA: 8.68

Nov 2022 – July 2026

Mumbai, Maharashtra, India

B.K.Birla College of Arts, Science and Commerce

11th and 12th HSC, Science - Percentage: 90.33

2020 - 2022

Mumbai, Maharashtra, India

St. Thomas High School

10th SSC - Percentage: 94.40

2009 - 2020

Mumbai, Maharashtra, India
