

Deep Patel

Mumbai, India | +91-9152743762 | deep.patel22@spit.ac.in | [linkedin](#) | [Github](#)

Education

Sardar Patel Institute of Technology | CGPA : 8.21/10

Aug. 2022 – Present

- B.Tech in Computer Science and Engineering (AIML)

K.J. Somaiya College of Science and Commerce

May 2020 – May 2022

- HSC: 84.83% | MHT-CET: 99.50 percentile

Work Experience

Web Developer Intern, Ekdanta Engineers

Jul 2023 – Sep 2023

- Developed a custom **analytics dashboard** using **React** and **Express**, integrated with **Google Sheets API** for **real-time data updates and secure access**, improving reporting efficiency
- Enhanced application security by implementing **JWT Authentication**, ensuring robust user access control mechanisms from the start.
- **Automated internal reporting** workflows, reducing manual effort by **35%** and improving overall **data accessibility**

Projects

Critical A.I Response Engine (C.A.R.E) | [GitHub](#) | *React Native, Express, LangChain, Postgres*

March 2025

- Designed an AI-powered **emergency response** mobile application leveraging **multilingual voice** recognition with **langchain** to **auto-classify distress calls** into medical, fire, or police emergencies
- Integrated **RabbitMQ** for asynchronous, **fault-tolerant message passing** with delivery guarantees, ensuring reliable handoff between classification and dispatch modules
- Applied spatial analysis using the **PostGIS** library to identify **nearest emergency responders**, enabling data-driven and efficient resource allocation under real-time constraints

Travello | [GitHub](#) | *React Native, Ola Maps API, LangGraph, Flask*

April 2025

- Designed and developed a full-stack urban **mobility platform** with a Flask backend and a cross-platform React Native frontend, enabling users to discover **optimized, multi-modal travel routes**.
- Integrated **OpenTripPlanner (OTP)**, **GTFS feeds**, and **Ola Maps API** to deliver real-time commute options with detailed **ETA, fare, and route breakdowns** for buses, metros, and ride-hailing services.
- Implemented an intelligent **routing engine** using **LangGraph** to dynamically generate route suggestions based on user preferences, travel costs, live traffic, and environmental impact.

EcoImpact | [GitHub](#) | *React, Express, Python, MongoDB*

Jan 2025

- Built a mobile app that **tracks carbon emissions** across 5+ categories with centralized dashboard for eco-metrics, helping users reduce footprint by 20 through gamified sustainability goals.
- Built a green product recommendation engine using **Gemini** for **image-based analysis** and **Faiss** for fast retrieval across 1,000+ items, coupled with **OCR-powered electricity bill parsing** to generate personalized energy-saving suggestions.

Position Of Responsibilities

Executive Head, Virtual Stock Market - Oculus

Mar 2023 - Mar 2024

- Led a **37-member** team to deliver **VSM**, a finance event at **Oculus 2024** with **300+ participants**, and managed a **Rs.85,000** budget across marketing, logistics, and tech.

Achievements

1st Place: Shark-A-Thon (RGIT), VESIT Hackathon, Minithon-SPIT, Blueprint (IIT Delhi)

2nd Place: Innovation Oasis (IIIT Nagpur), Ideathon (VESIM), Shark Tank (ISBM)

Technical Skills

Languages: Python, JavaScript, SQL, HTML, CSS

Frontend: React, React-Native, Material-UI, Tailwind, Bootstrap

Databases: MySQL, MongoDB, Supabase(Postgres)

Backend: Node.js, Express.js, Flask

Miscellaneous: Git, GitHub, JWT, Socket.IO
