Education

Sardar Patel Institute of Technology CGPA: 7.64 (as of Sem 6) **2022 – 2026**

Bachelor of Technology in Computer Science and Engineering with Specialisation in AIML *Mumbai, Maharashtra*

Brio Poddar International 87.2% **2020 – 2022**

11-12th Science PCM, CBSE *Mumbai, Maharashtra*

Rajhans Vidyalaya 92.6% **2010 – 2020**

1-10th, CBSE *Mumbai, Maharashtra*

Relevant Coursework

- Data Structures
- Database Management
- Machine learning
- Operating systems
- Algorithms Analysis
- Artificial Intelligence
- Deep learning
- Computer Architecture

Projects

CareerYatra – Job Matching Platform | *Python, NLP, ML, Flask, MySQL* **January 2025**

- Developed an AI-powered job matching platform tailored for the Indian job market, addressing inefficiencies in traditional systems.
- Streamlined the process for users to access career resources, fostering better career decision-making.
- Focused on scalability and accessibility to cater to diverse user needs.
- Implemented a structured layout with dynamic features to assist users in exploring career paths.

InfinityPlay Website | *React, Next.js, Python* **December 2024**

- git link: <https://github.com/ligma8a115/infinity-play>
- site link: <https://infinityplay.vercel.app>
- Developed a full-stack platform in Go to play classic HTML5 & Shockwave Flash games on modern browsers.
- Made user-friendly interface with no login required, with easy navigation, search, and category-based differentiation of games.
- Added user feedback collection and game recommendation features.

Roundabout Detection using GIS | *Python, GeoPandas, Shapely, QGIS* **May 2025**

- git link: https://github.com/ligma8a115/HERE_SPIT_HACKATHON_2025/tree/main/team-CodeBlooded
- Designed a detection pipeline to identify roundabouts from vector road shapefiles using polygonization and geometric filtering.
- Computed shape circularity and incoming road count to classify valid roundabouts with manual validation support.
- Exported results to GeoPackage and CSV formats for QGIS and spreadsheet-based verification using a boolean label.
- Enabled rapid visual inspection and review of predicted roundabouts, with interactive plotting via Matplotlib.
- presented and reached finals in Hackathon by Here Technologies

Certificates and Achievements

- **Certified in Generative AI Fundamentals** – Completed course and recieved certification from Vizura. Certificate link: https://vizuara.ai/tutor-certificate?cert_hash=31cf8daa2989419b
- **Hackathon Finalist – Here Hackathon 2025** – Reached in top 10 finalist teams with a project on Roundabout detection.

Technical Skills

Programming Languages: Python, Java, C, SQL

Languages: English, Hindi, Marathi

Web: HTML, CSS, JavaScript, Flask, React

Developer Tools: Google Colab, VS Code, Google Cloud Platform, Amazon AWS

Frameworks and Libraries : Numpy, Pandas , TensorFlow , Matplotlib, Dialogflow, YOLO, BeautifulSoup

Technologies: Linux(ubuntu), GitHub, WordPress
