EDUCATION

- Sardar Institute of Technology** Mumbai, India
B.Tech in Computer Science; CGPA: 8.14 2022 - 2026

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript, Python, Tailwind CSS

Frameworks: React, React-Native, Node, Express, NextJS, Scikit, Pandas, Matplotlib

Tools: GIT, MongoDB, MySQL, VS Code, WebSockets, Selenium

Coursework: Machine Learning, Operating Systems, Data Structures & Algorithms, Computer Networks.

PROJECTS

- Women Empowerment (All-in-One) App** | *React, React Native, Node.js, Flask, MongoDB, Offline Storage*
 - Designed and built a modular, cross-platform mobile and web ecosystem—**Shakti (Safety)**, **Shree (Finance)**, **Sakhi (Growth)**—empowering women with real-time, **AI-driven tools** and offline support.
 - Engineered a robust **SOS system** with live media streaming, OTP verification, and smart torch/alarm features, along with **snatch detection** and **fake calling**, ensuring safety even without internet access.
 - Implemented an intelligent **expense tracker** with document scanning, AI-based categorization, and a **financial simulation tool** teaching UPI, banking, and ATM workflows—making finance accessible.
 - Developed an AI-backed **skill matcher**, learning roadmap generator, and community forum, enabling users to discover mentors, jobs, and **personalized upskilling**.
- Rapid Cross-Border Compliance Checker** | *Flask, React, MongoDB, CrewAI, Composio, Twilio*
 - Developed an **AI-powered platform** to automate cross-border compliance checks for international shipments.
 - Integrated a **RAG model** for real-time retrieval of country-specific compliance rules from government portals and logistics providers which is scraped from websites using **Selenium**.
 - Implemented a **prohibited item checker** with country-wise and item-based search functionalities, exportable to PDF, CSV, WhatsApp, and SMS.
 - Built an **image-based compliance analysis system** for accurate item detection and dynamic ban list generation.
 - Designed a **bulk shipment compliance** feature with CSV upload and parallel processing for high scalability.
 - Supported **multilingual accessibility** with integrations for WhatsApp, SMS, and email, along with web and mobile support.
- AI-Powered Multilingual Communication Assistant** | *Whisper, Bhashini, React, Flask, Web Extension*
 - Built a cross-platform **AI communication tool** that transcribes voice into structured text using **Whisper**, enhancing clarity and accessibility for all users.
 - Integrated **Bhashini** for real-time multilingual translation and **auto language detection**, enabling seamless, inclusive messaging across diverse linguistic backgrounds.
 - Developed a **context-aware suggestion engine** that detects intent (e.g., “mail him”), offering actionable follow-ups such as auto-sending emails or task linking.
 - Enabled **personalized corrections**, deployed via both a mobile app and **browser extension**, ensuring consistent performance across devices.

ROLES AND RESPONSIBILITIES

- Marketing Head** Sep 2024
Oculus, S.P.I.T. Mumbai, India
 - Developed and executed marketing plans across digital and offline channels.:

ACHIEVEMENTS

- 1st place** at CodeCrafter 2.0 Hackathon 2025 – Saraswati College of Engineering, Navi Mumbai.
- 1st place** at Aairavat 2025 – Sardar Patel Institute of Technology Hackathon.
- 1st place** at Level Up 2025 – KJ Somaiya College of Engineering.
- 1st Runner-up** at IIT Kharagpur Blockchain Summit – Blockchain Hackathon 2025.
- 1st Runner-up** at Logithon 2025 – IIT Bombay.
- 2nd Runner-up** at Odoo – National Level Hackathon 2025, Gujarat Vidyapeeth.
- AIML Domain Winner** at HACKANOVA 2025.
- 2nd Runner-up** at Technitude – International Hackathon, SP Jain School of Global Management.
