EDUCATION

- Sardar Patel Institute of Technology | CGPA: 7.82 Mumbai, India
B.Tech in CSE with Specialization in AI-ML Nov. 2022 - Present

WORK EXPERIENCE

- AskGalore Digital India Pvt. Ltd. Remote
AI Developer Intern March 2025 - April 2025
 - Worked with a team of 3 AI Engineers to develop a physiotherapy tracking tool using Python, **OpenCV**, **PoseNet**, and **OpenPose** to automate joint angle detection (knee, elbow, neck, etc.), achieving over **90% accuracy** for each.
 - Engineered system prompts with **Langchain** and **OpenAI GPT** models to generate accurate, structured forensic reports from case data, increasing **factual consistency by 20%**.
 - Contributed to data preprocessing, model evaluation, and documentation using **NumPy**, **Pandas**, and **Scikit-learn**, improving process efficiency and supporting reproducible ML workflows.
- HUE-AI Remote
NLP Data Engineering Intern Feb. 2024 - May 2024
 - Implemented and fine-tuned Meta's **LLaMA2 model (7b and 13b parameters)** on a custom **dataset of 1000+ conversations** to enhance **chatbot performance**, demonstrating a deep understanding of generative models.
 - Conducted extensive research and applied prompt engineering techniques to **optimize chatbot responses by 22%**, enhancing user experience and response quality.

PROJECTS

- GeoFix | *Python, Scikit-learn, Flask, GeoPandas, GDAL, DBSCAN, Mapillary API*
 - Led a team of 4 to build an ML-based pipeline for POI anomaly detection using **Z-score**, **IQR**, **DBSCAN**, and **LOF**, improving location data accuracy across **3,000+ points** in Singapore's urban landscape.
 - Integrated the **Mapillary API** and a **custom CNN model** to suggest corrected POI coordinates from street-level imagery, enhancing geospatial data reliability for decision-making.
- QuantWise | *Python, LSTM, ARIMA, RL, GARCH, NLP*
 - Created a hybrid **LSTM-ARIMA model** for stock price prediction, achieving an **RMSE of 3** on historical financial data.
 - Applied **Reinforcement Learning** for asset allocation and used **GARCH** and **Value-at-Risk (VaR)** for risk assessment and volatility modeling.
- Whimsical Wardrobe | *Python, Gemini API, TensorFlow, Flask, Langchain, RAG, Selenium*
 - Solely handled all **AI/ML development**, including **feature vector extraction** from wardrobe images and integration with the **Gemini API** to recommend outfits based on calendar events.
 - Integrated a **virtual try-on system** using the **Kolors** model and built a scraper with **Selenium** to recommend **100+ matching items** from over **10 online stores**.
 - Developed a **RAG-based chatbot** using **Langchain** to deliver wardrobe-aware clothing advice for events like travel, parties, and work meetings.

SKILLS

- Languages:** C, C++, Python, SQL
- Technologies:** Flask, Numpy, Pandas, TensorFlow, PyTorch, Selenium, LangChain, OpenAI, LLaMA2, OpenCV, CNN
- Tools:** Git, GitHub, VS Code, PyCharm
- Concepts:** Data Structures and Algorithms, OOPs, DBMS

POSITIONS OF RESPONSIBILITY

- OCULUS - the Annual Festival of the college Sep. 2023 - March 2024
Head of Marketing
 - Led a cross-functional team of **100+ members** and managed end-to-end **sponsorship operations**, independently securing **Rs. 1+ Lakh** in funding.
 - Oversaw **budgeting**, **marketing strategy**, and **stakeholder communications**, demonstrating financial planning, leadership, and cross-functional coordination.

Achievements

- 1st Place:** Shark-A-Thon (RGIT), BluePrint - Regionals (IIT Delhi)
- 2nd Place:** Innovation Oasis (IIIT Nagpur), Ideathon (VESIM), Shark Tank (ISBM)
- 3rd/4th Place:** HERE Technologies Hackathon, Unicus (VJTI), Decode 5.0 (IIM Calcutta), Brandstruck (SJMSOM, IIT Bombay)
